

VOLUME-1

EPISODE-4

SECOND STRIKE

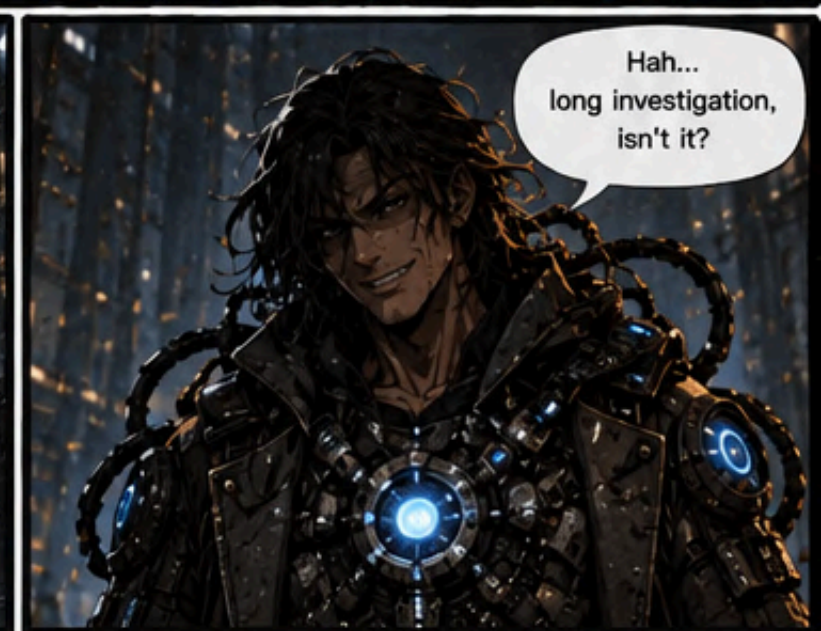

You shouldn't be here, Guardian.

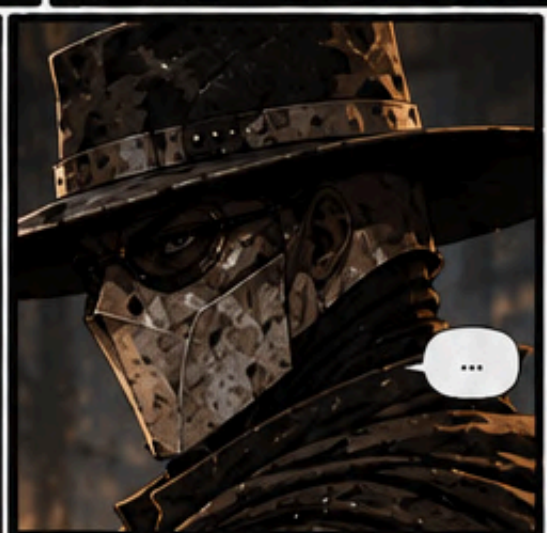

I am in the correct place... if you are here, Skipper.

Hah... long investigation, isn't it?

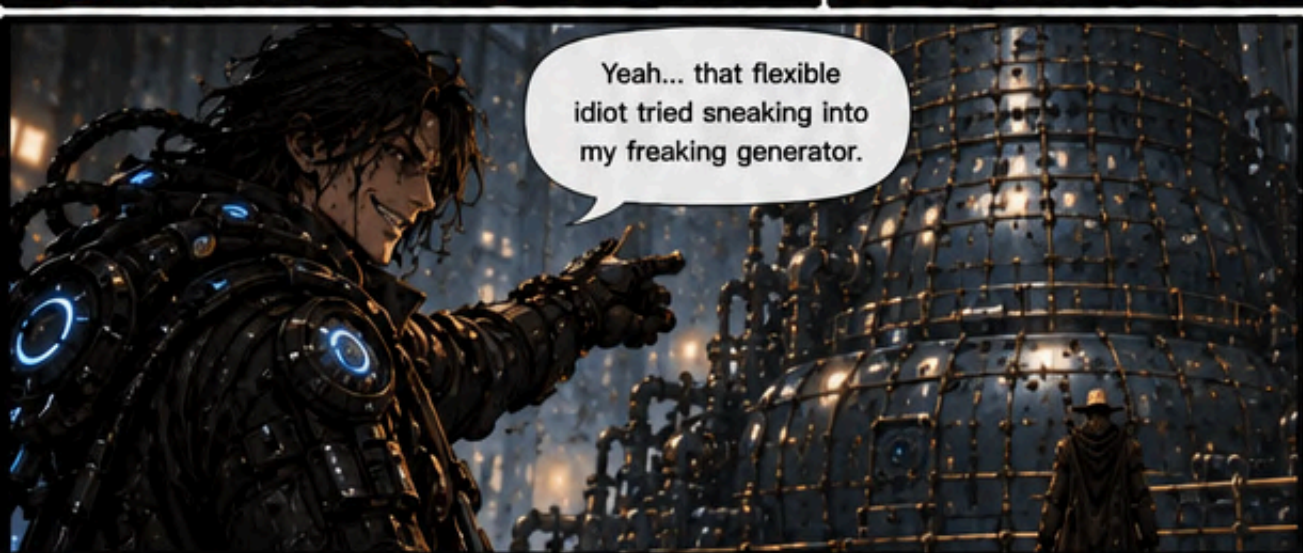

You came this far just to finally die in my hands, huh?

...

Where is Shape Shifter?

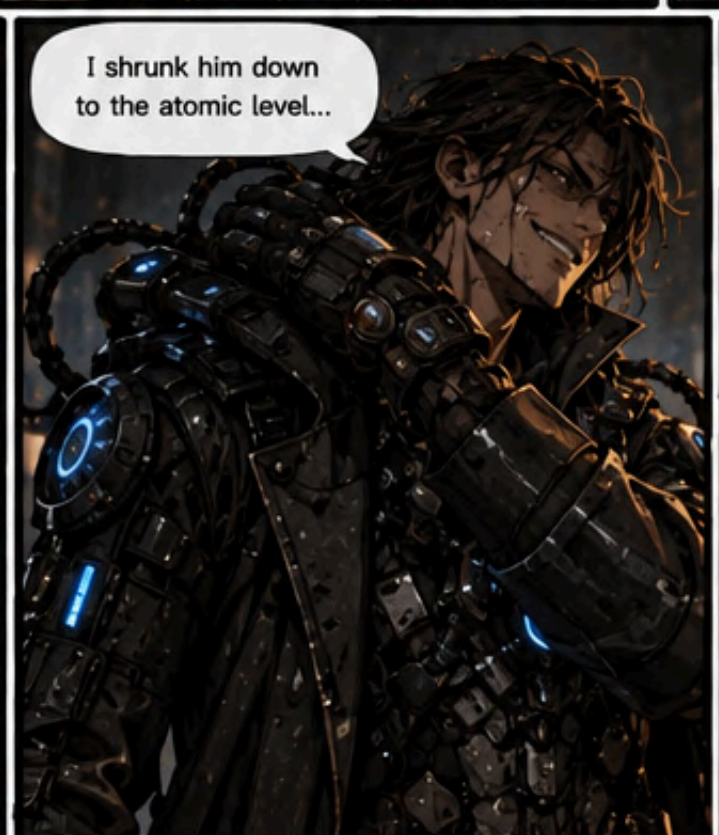

Yeah... that flexible idiot tried sneaking into my freaking generator.

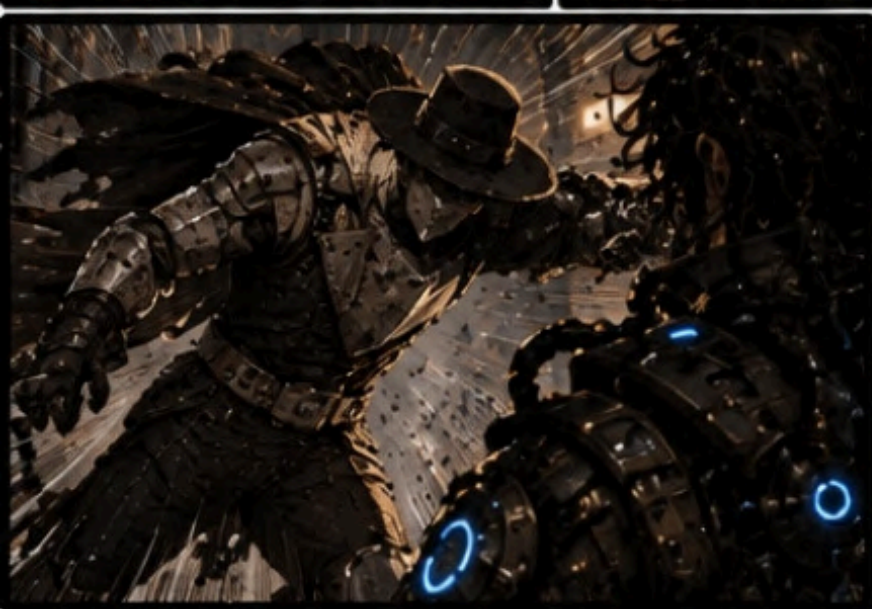

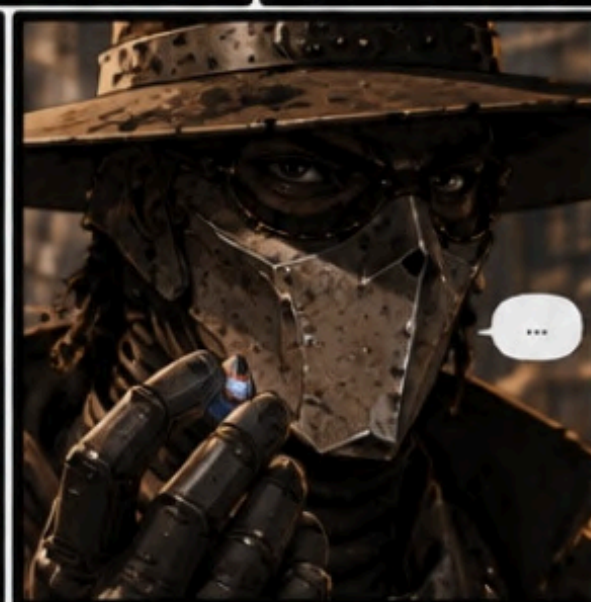

So I sent him somewhere he can finally show his real power.

I shrunk him down to the atomic level...

...using my brand-new QUANTIZER.

Enough playing around.

I've got to be quick now that you two know this place exists.

THUD!

THUD!
THUD!
THUD!

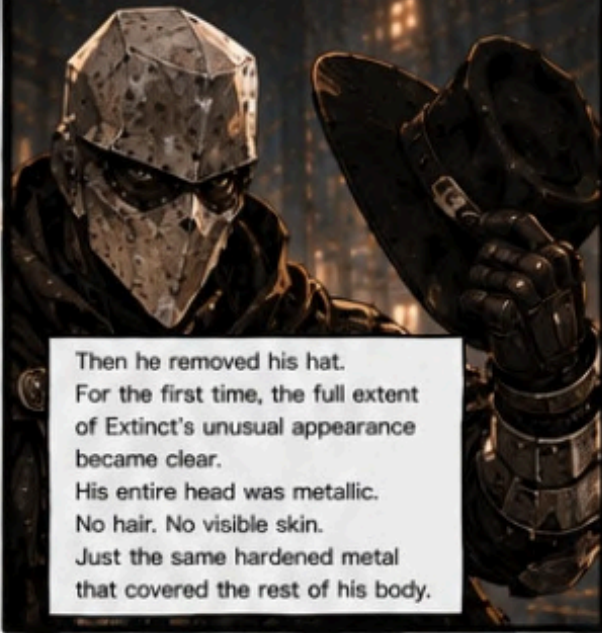

This tickles me, Extinct.

I expected more from you.

BOOM!

Then he removed his hat.
For the first time, the full extent
of Extinguish's unusual appearance
became clear.
His entire head was metallic.
No hair. No visible skin.
Just the same hardened metal
that covered the rest of his body.

The fabric split open.
Klin looked down.
There wasn't a single wound.
Only his shirt had been cut.

Nice skill,
Extinguish.

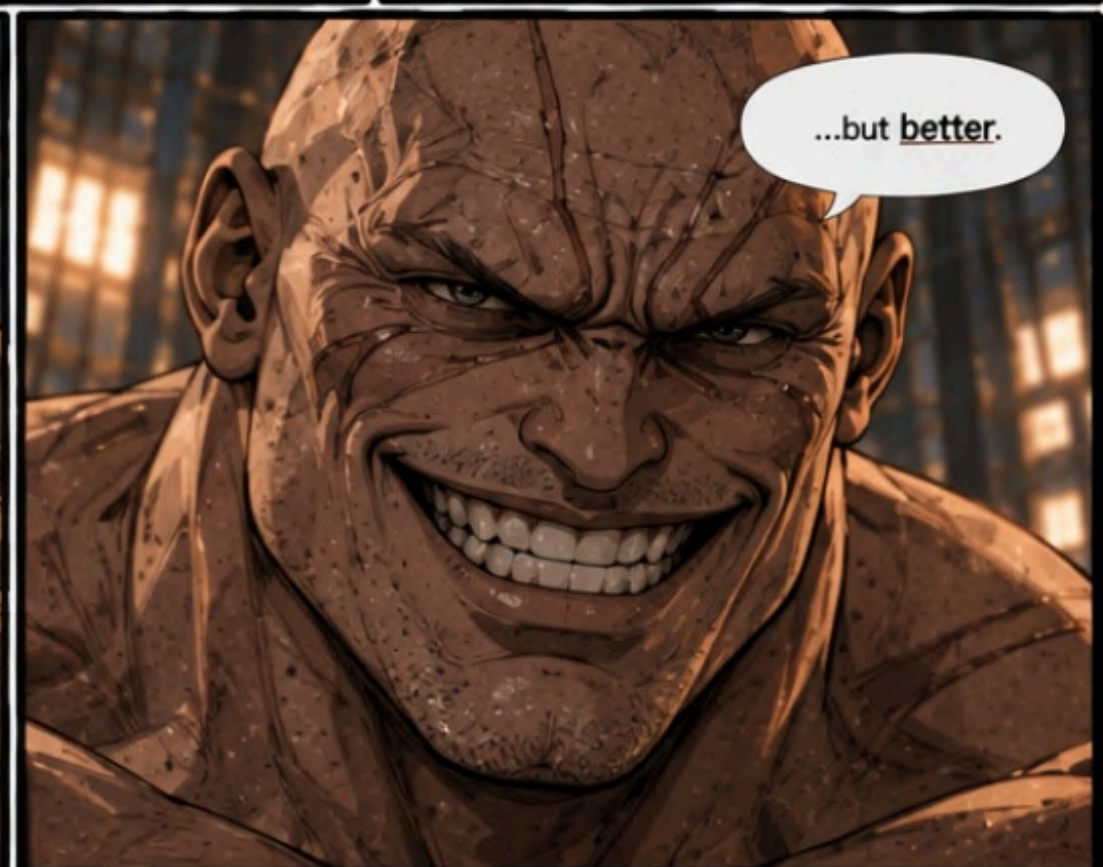

Extinguish stared at him.
For a brief moment,
something about him
seemed strange.

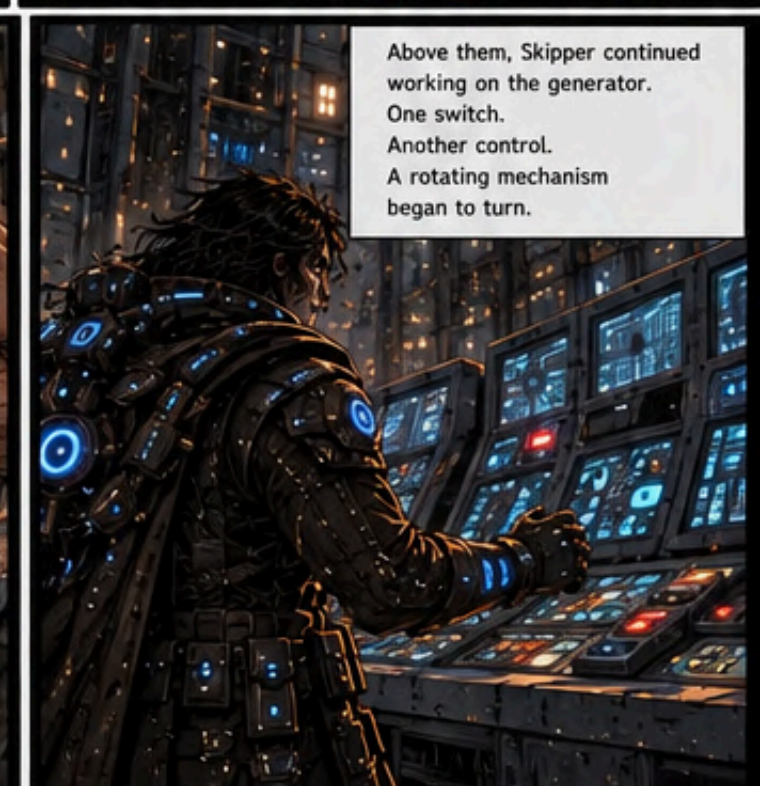

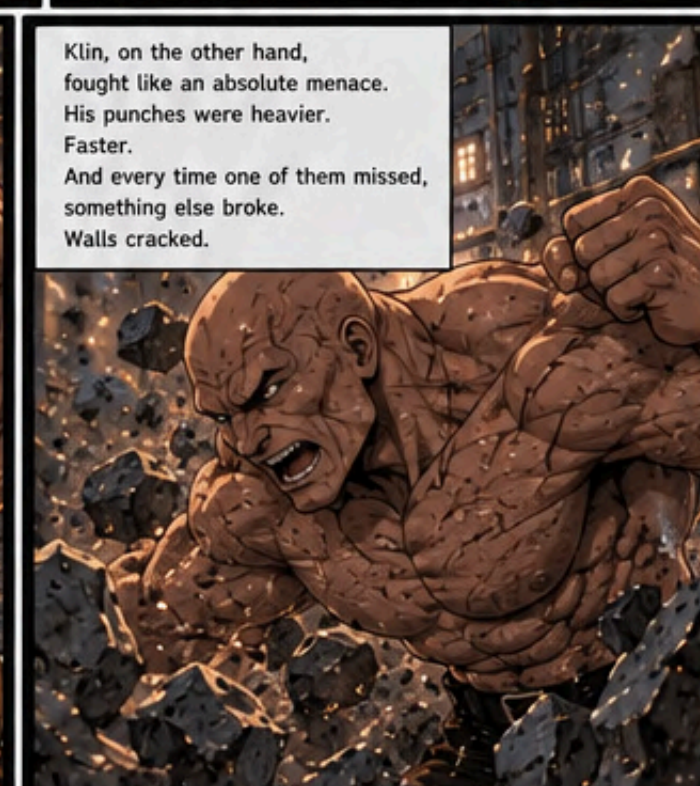

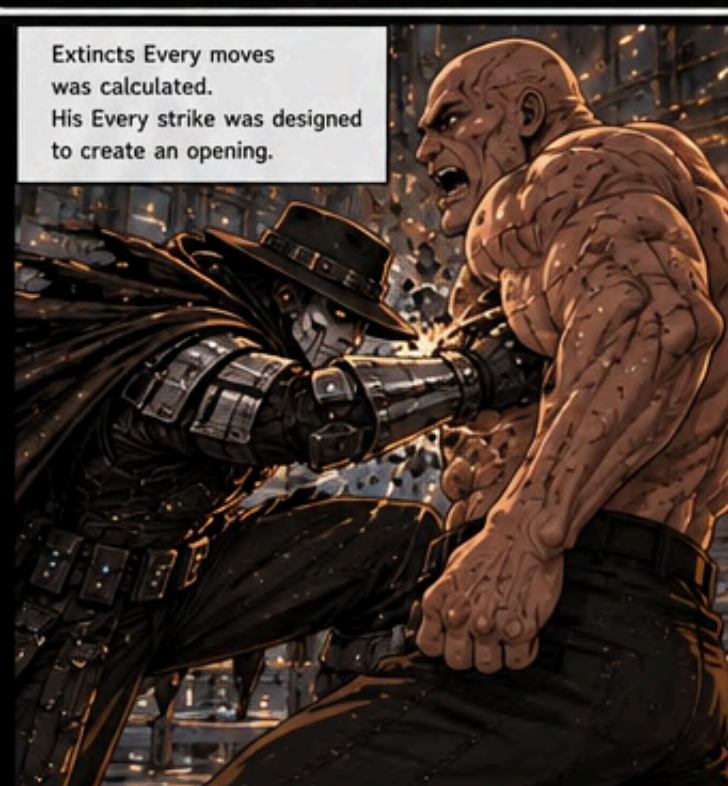

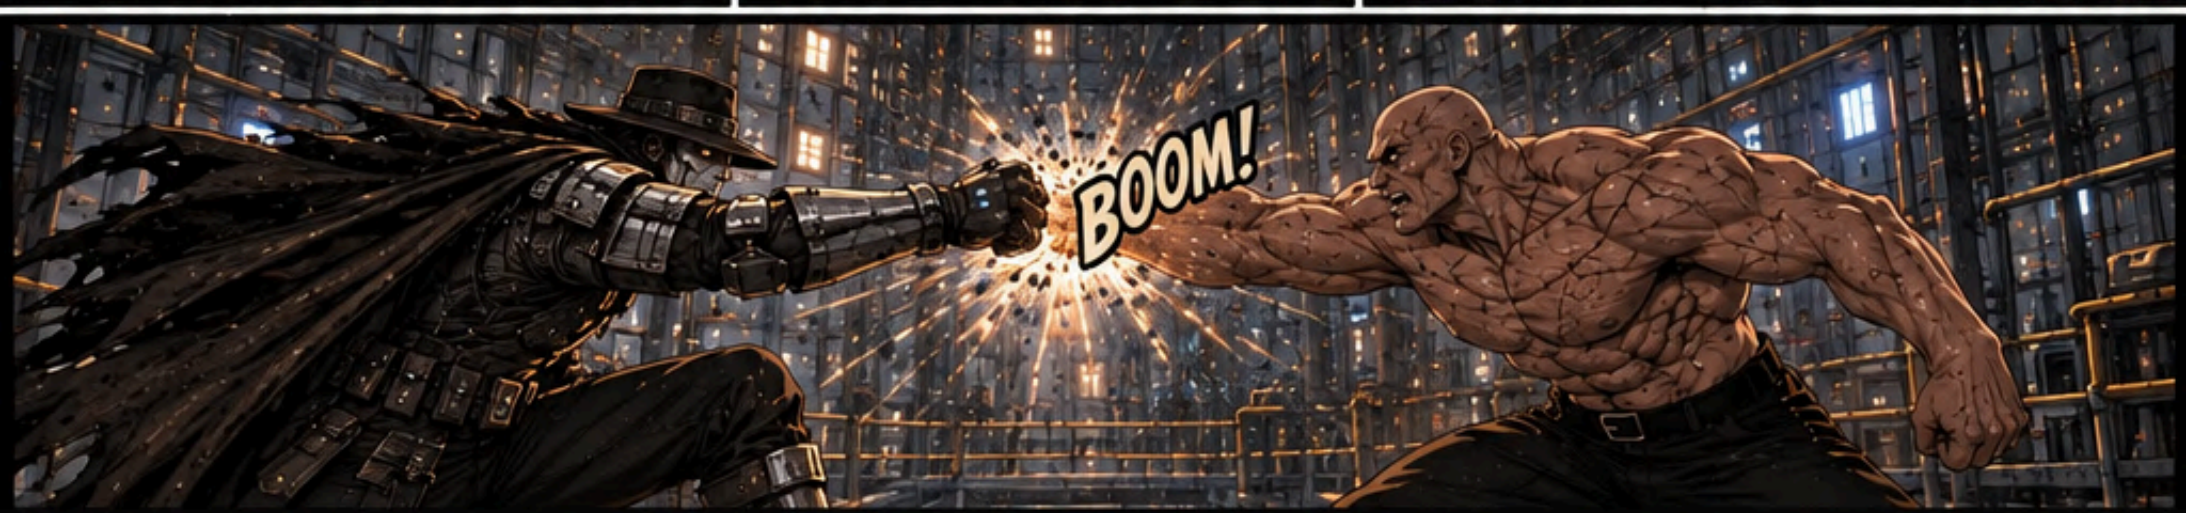

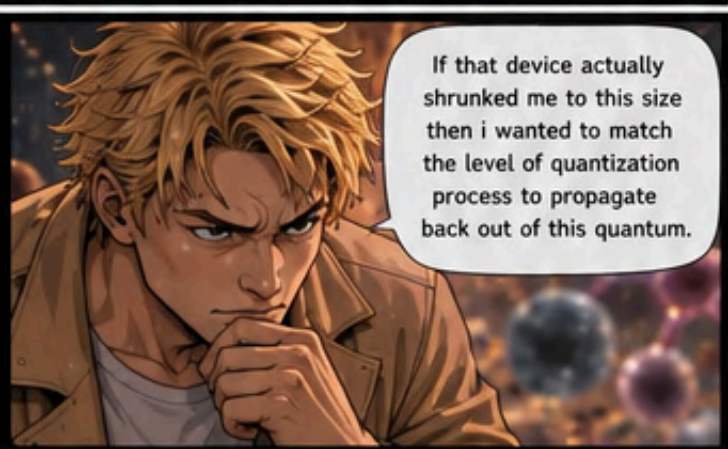

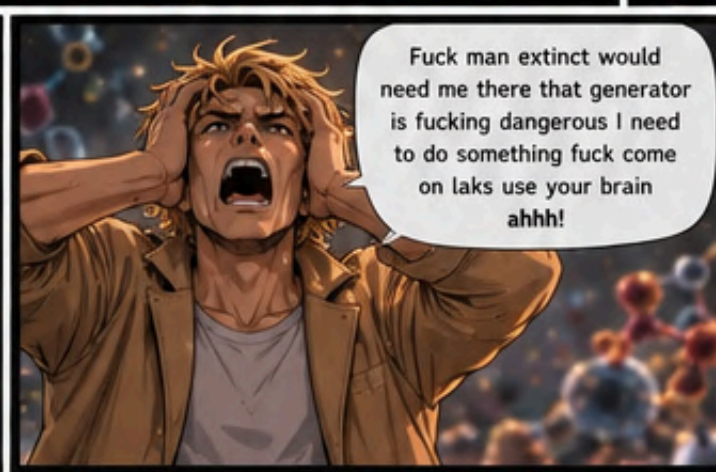

You're wondering
how a human can take
your punches,
aren't you?

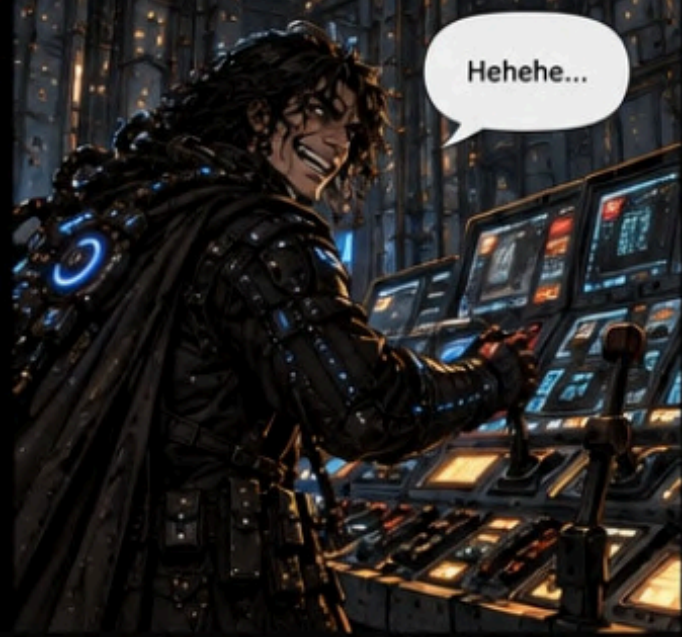

I am a super-mutant
like you...

...but better.

Hehehe...

If this generator works...

...your whole Ashton will go darker.

Hahahaha!

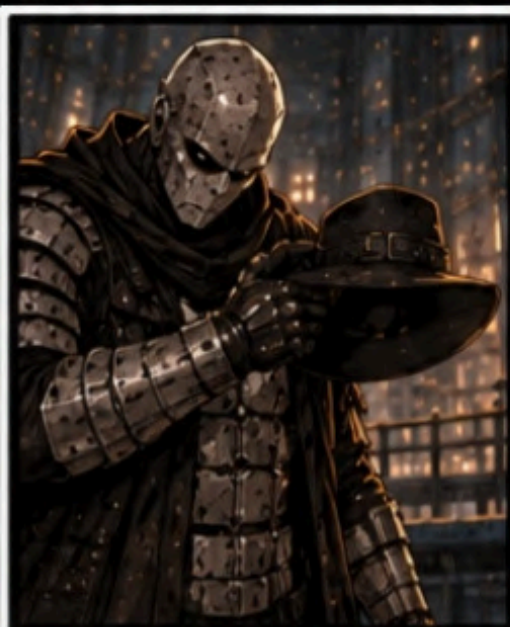

I need to stop him.

WHAM!

THUD!

WHOOSH!

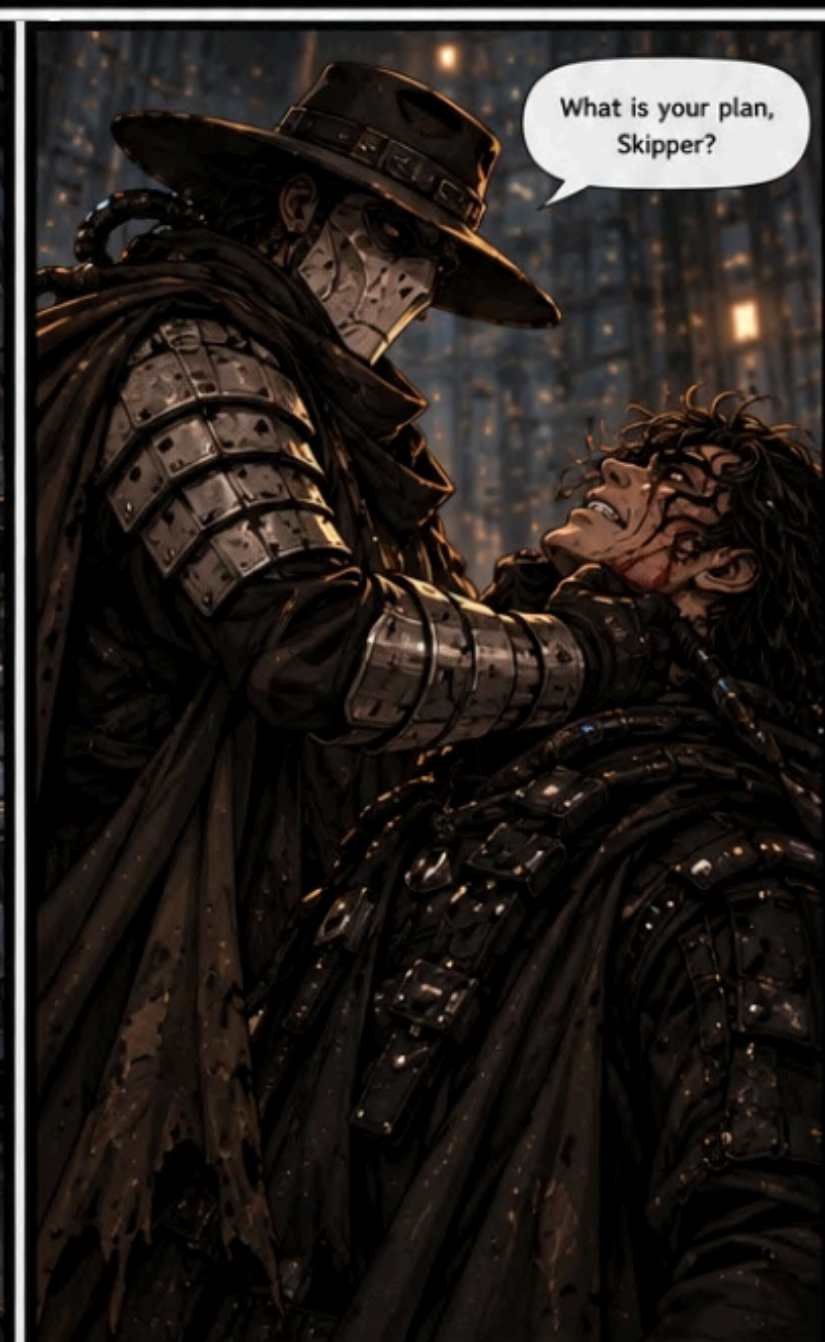

THWACK!

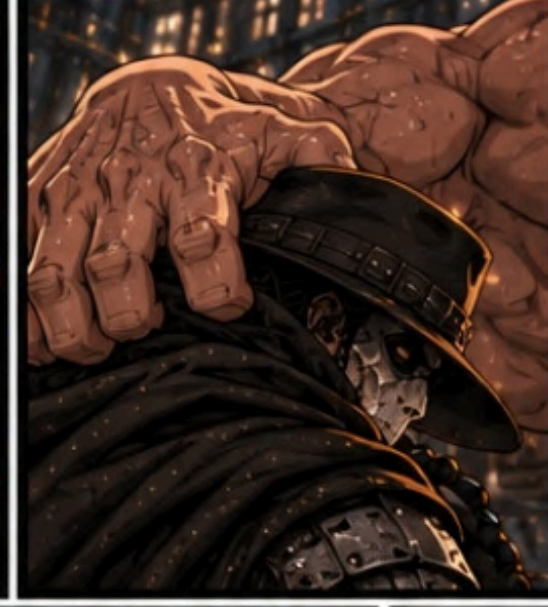

OW!

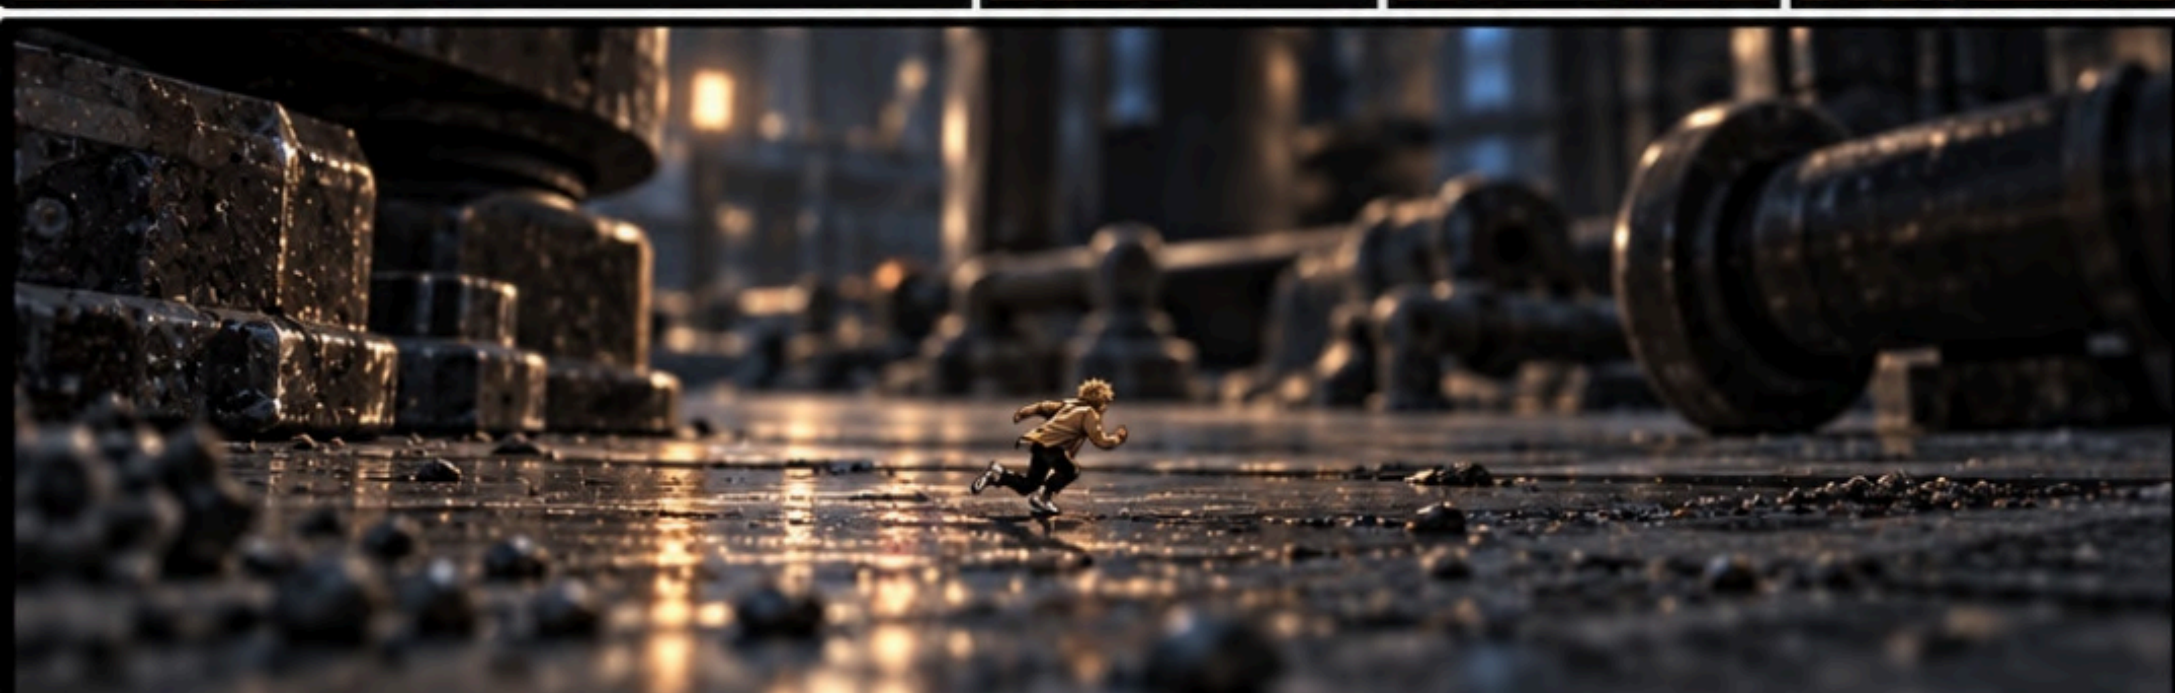

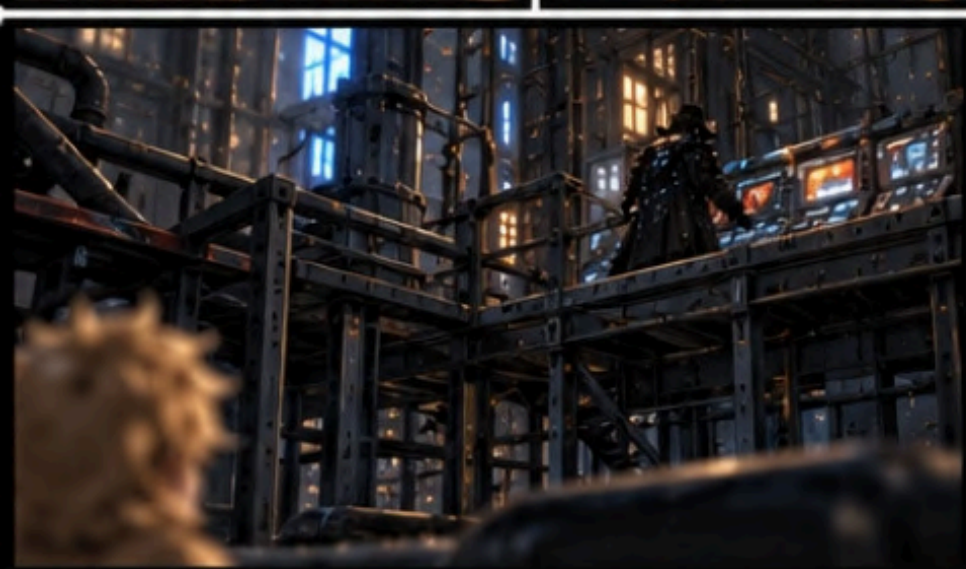

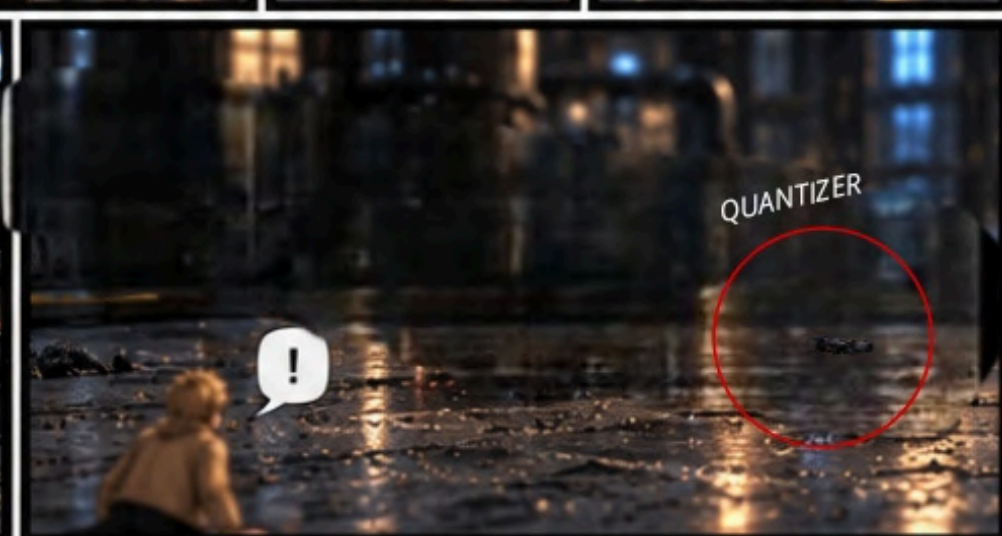

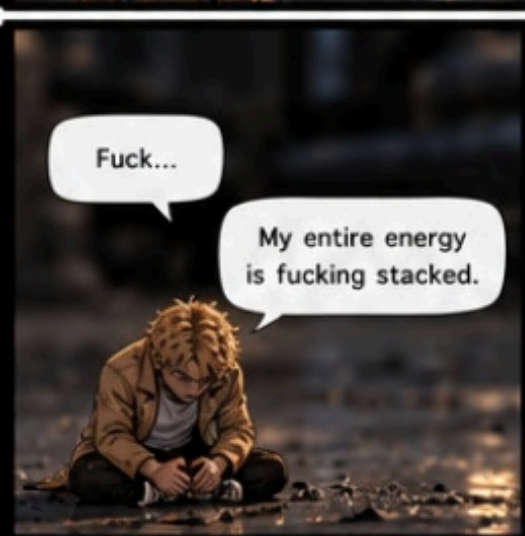

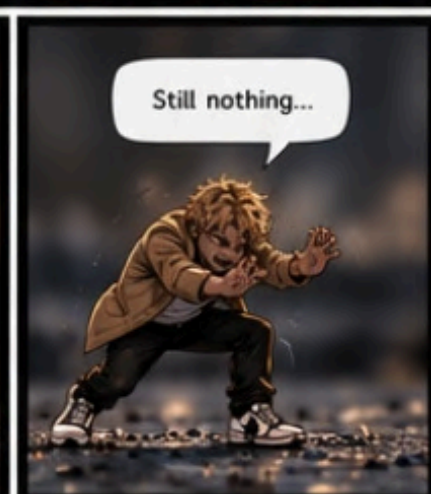

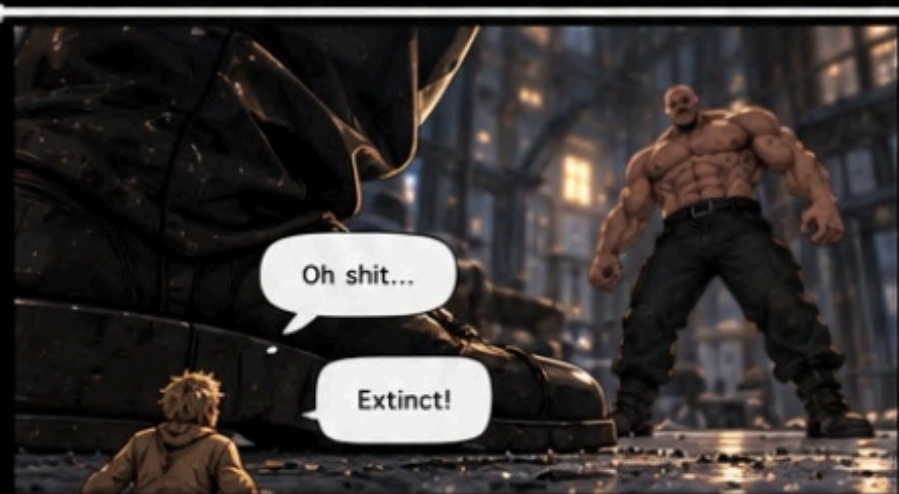

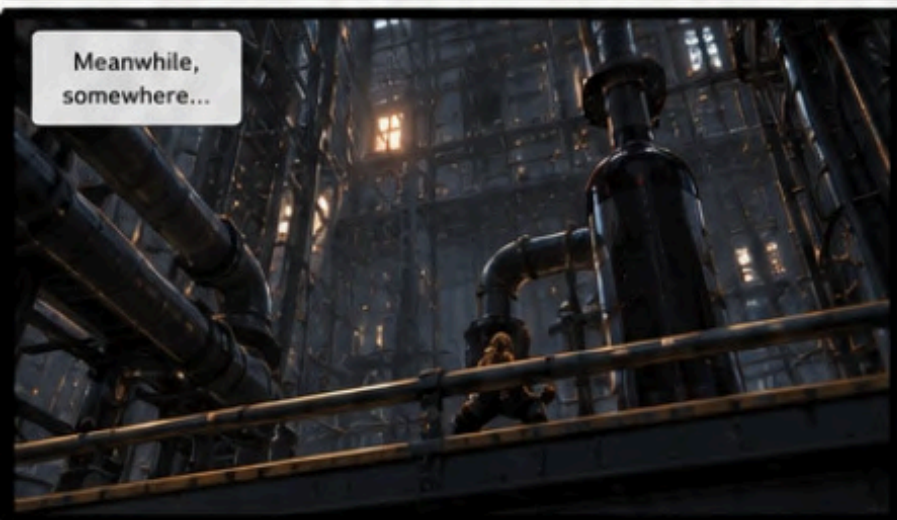

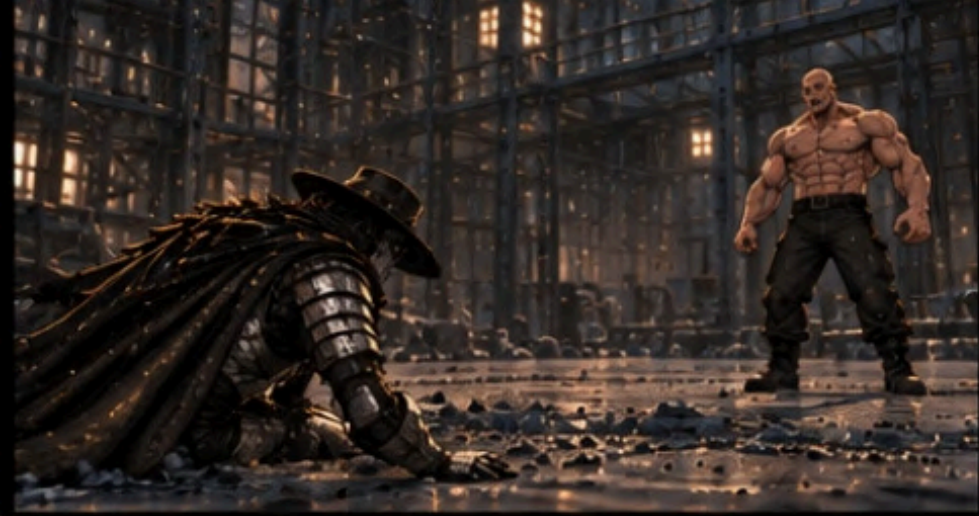

BOOM!

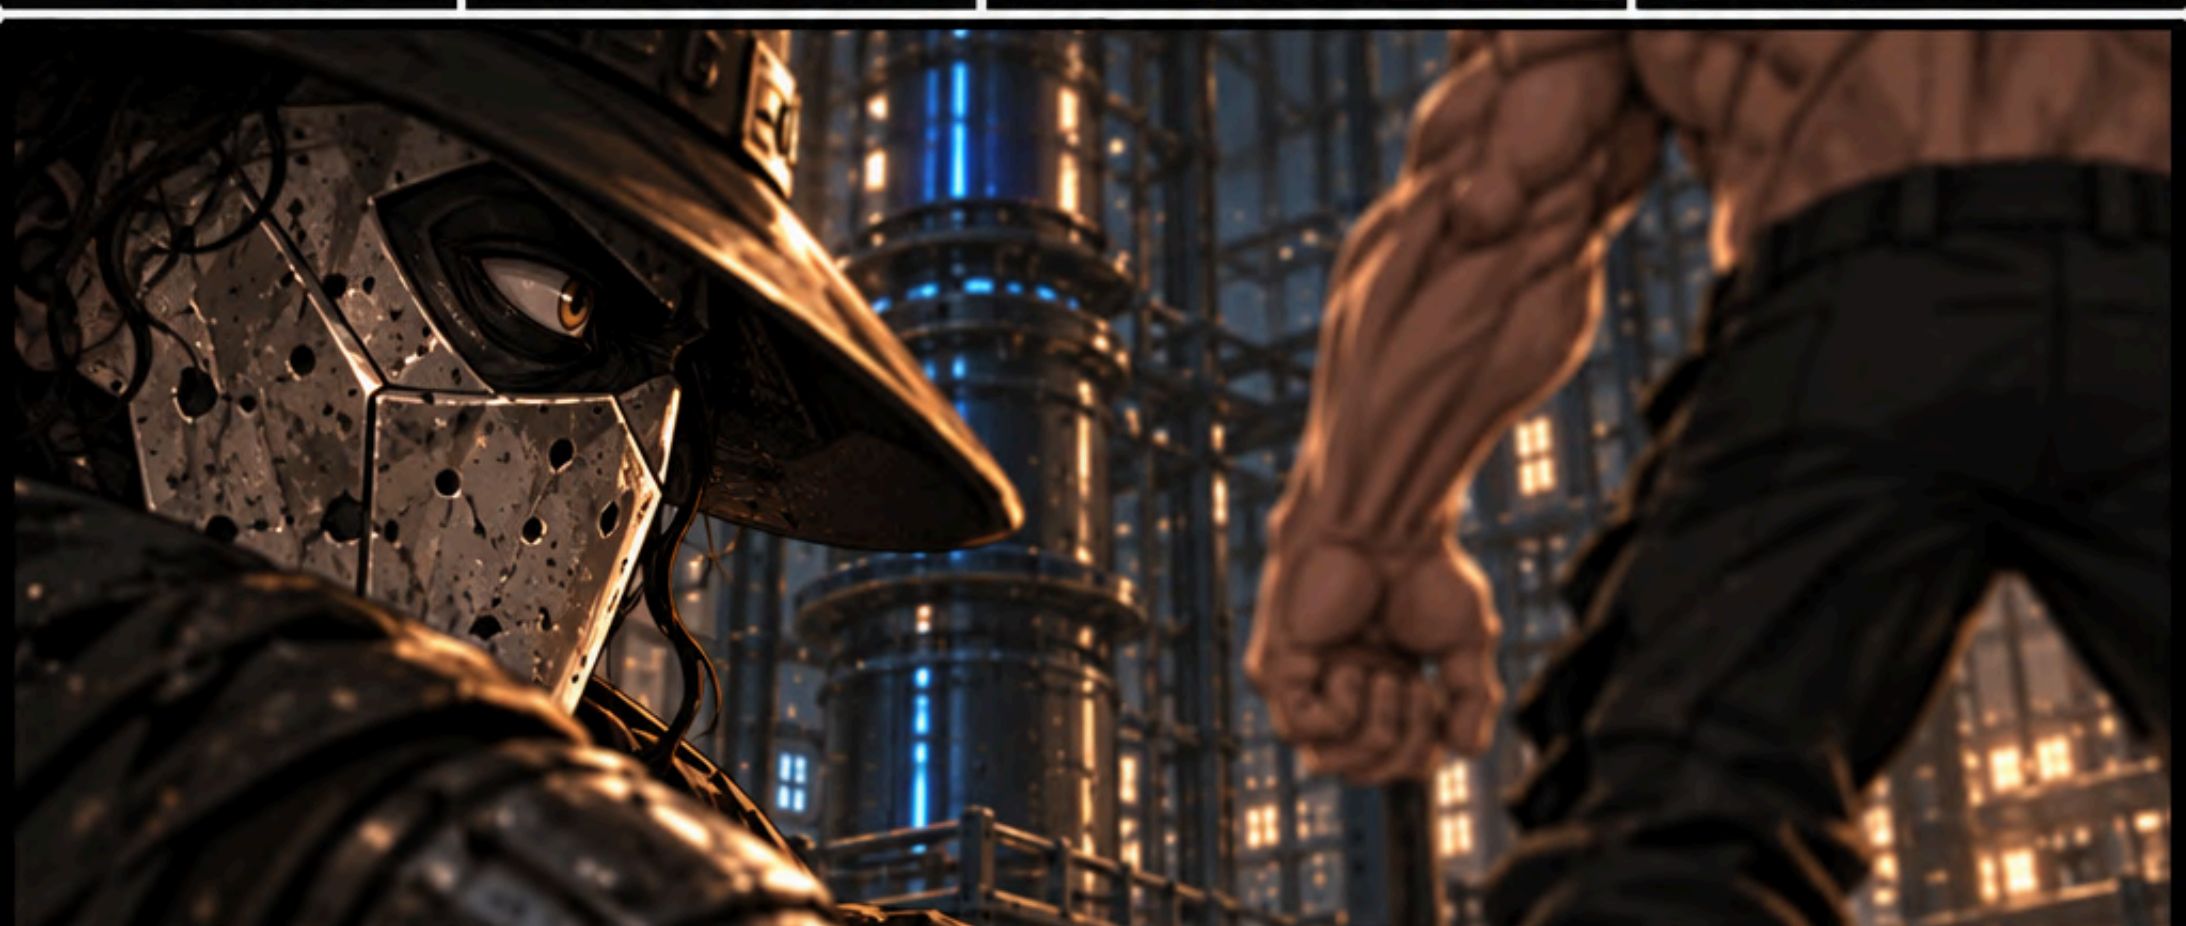

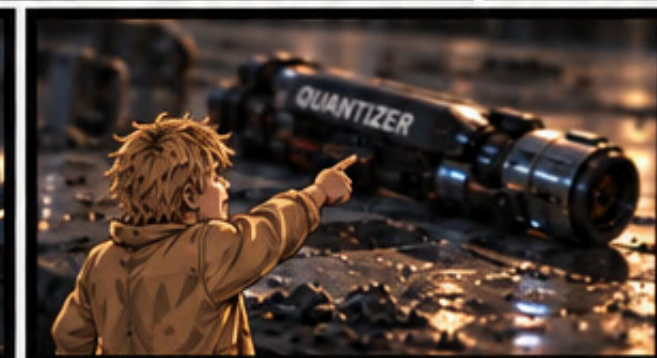

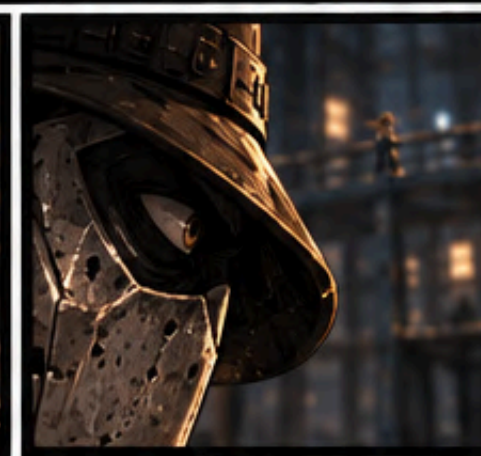

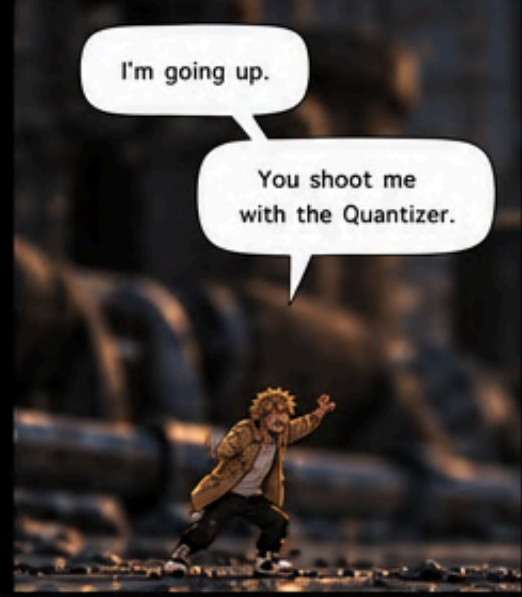

What is your plan, Skipper?

I'm going up.

You shoot me with the Quantizer.

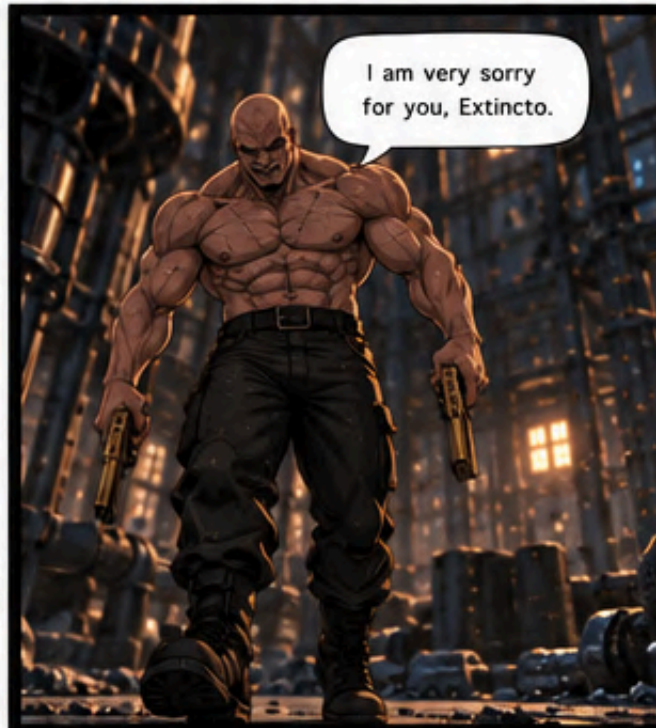

I think he understands.

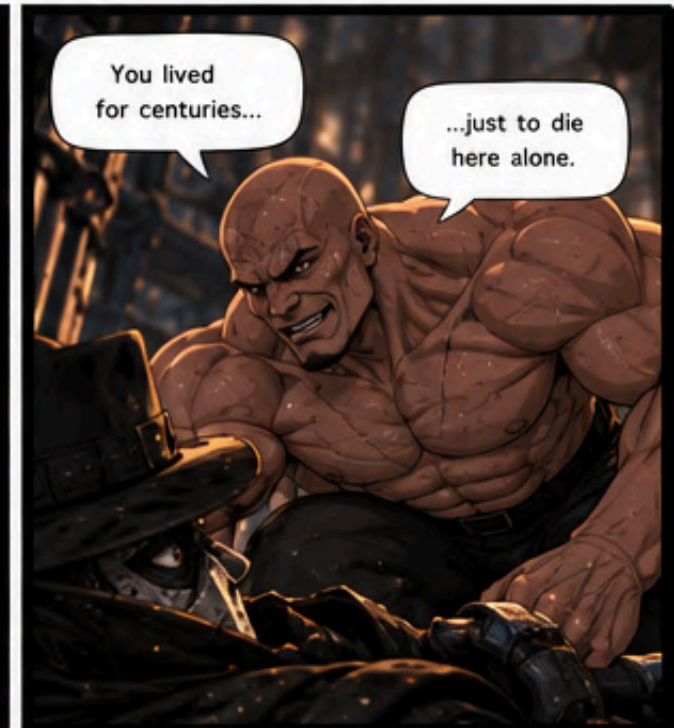

Otherwise...

...Ashton, sorry for you.

I am very sorry for you, Extincto.

You lived for centuries...

...just to die here alone.

Professor Proto knows everything about your Guardians.

He demonstrated the weak points of every single one of you.

Do you know what your weak zone is?

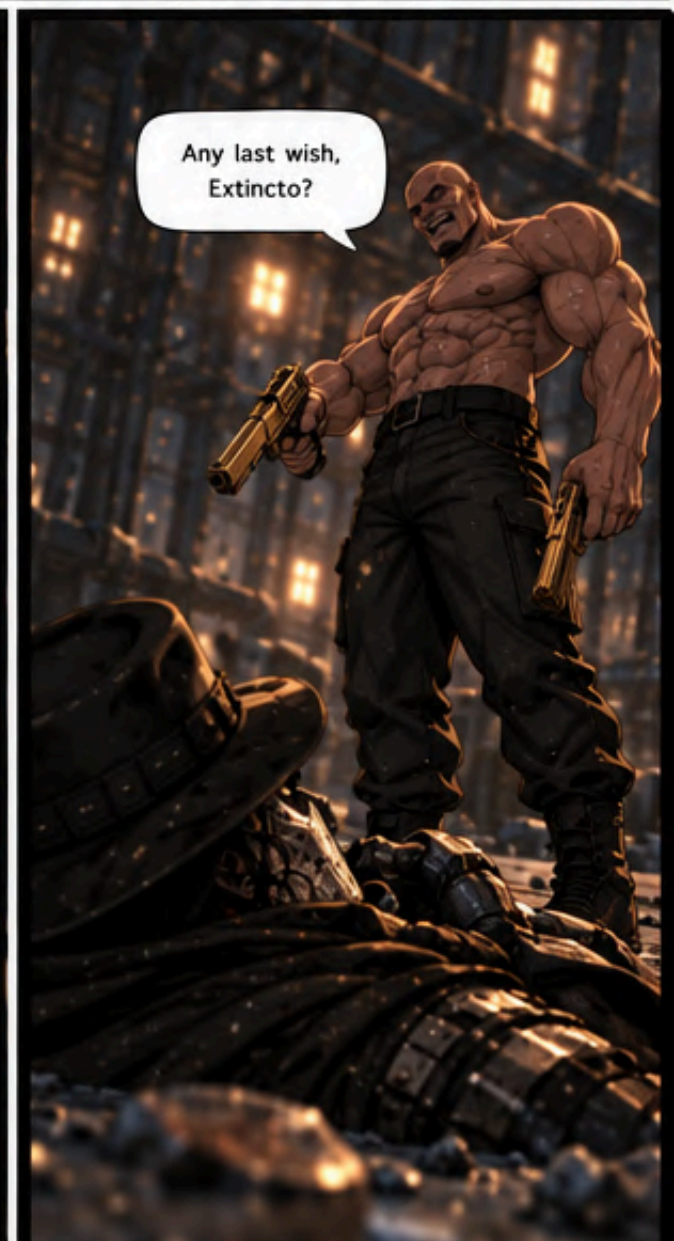

Your eyes, Extincto.

That is the only non-metal thing in your entire body...

...am I right?

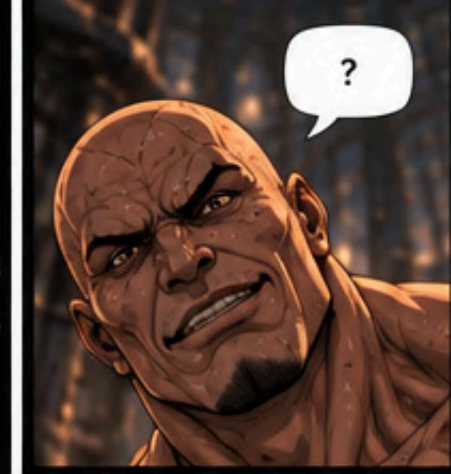

Any last wish, Extincto?

...

Do you know your weakness, Russian?

?

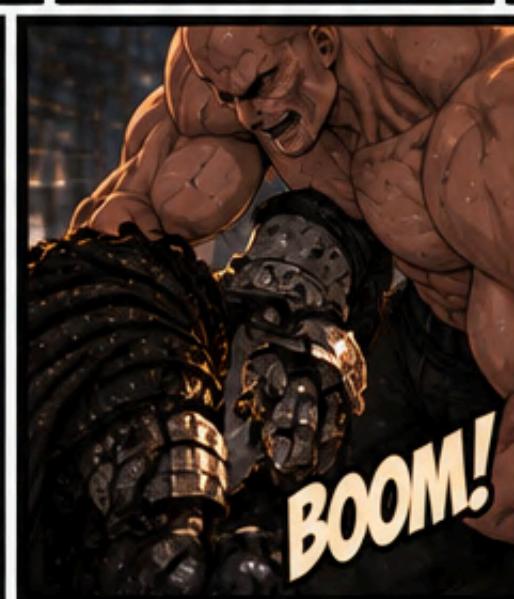

You talk too much.

AAAGH!

BANG!

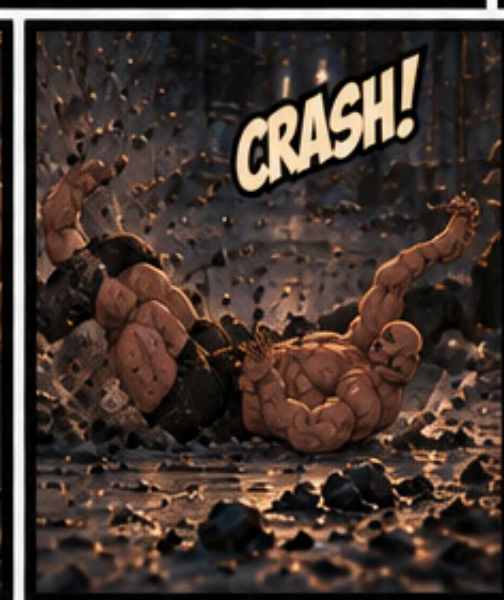

BOOM!

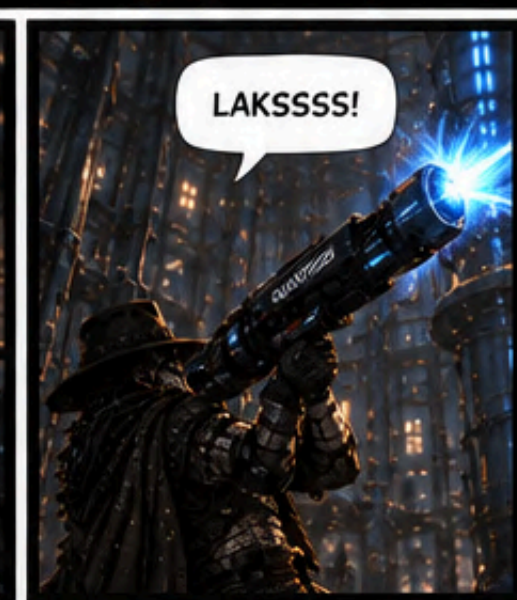

CRACK!

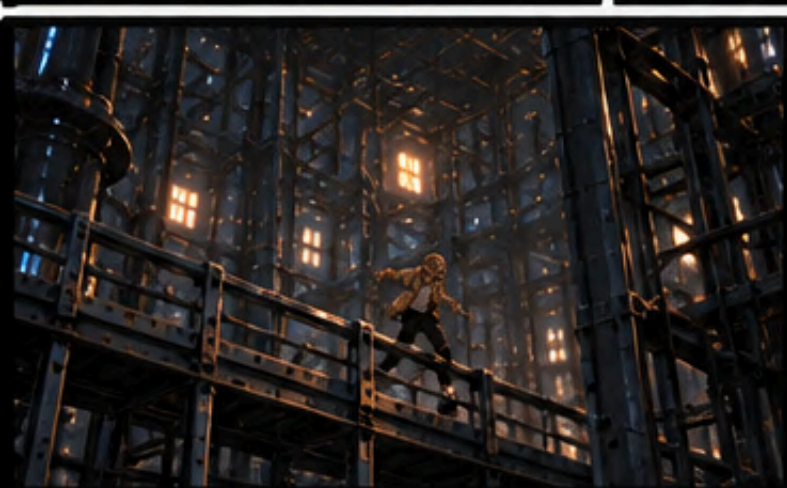

WHAM!

CRASH!

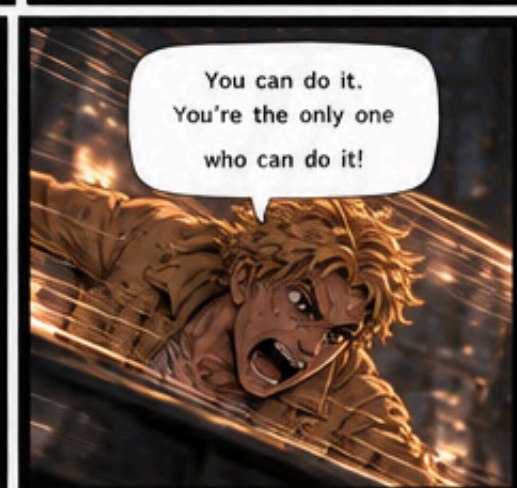

LAKSSSS!

Come on...

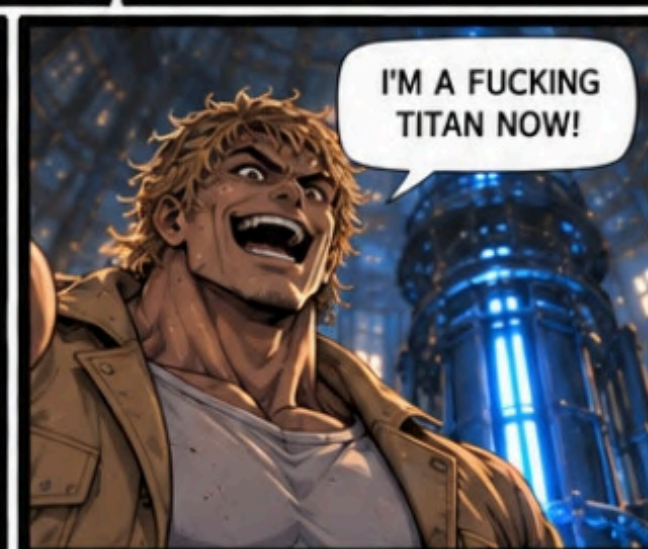

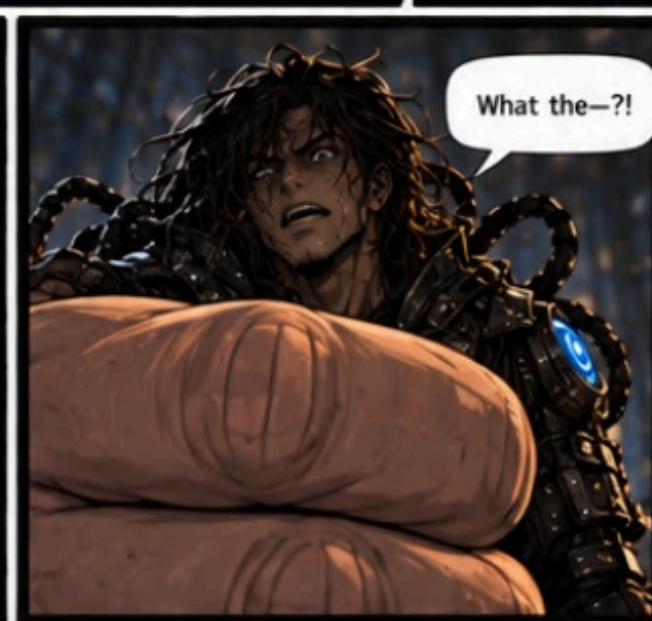

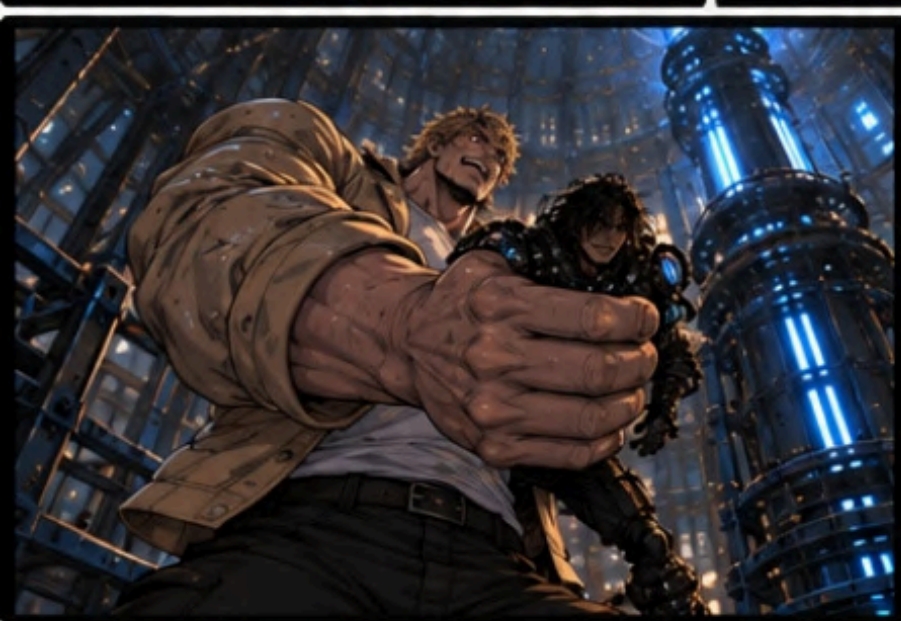

You can do it, Laks.

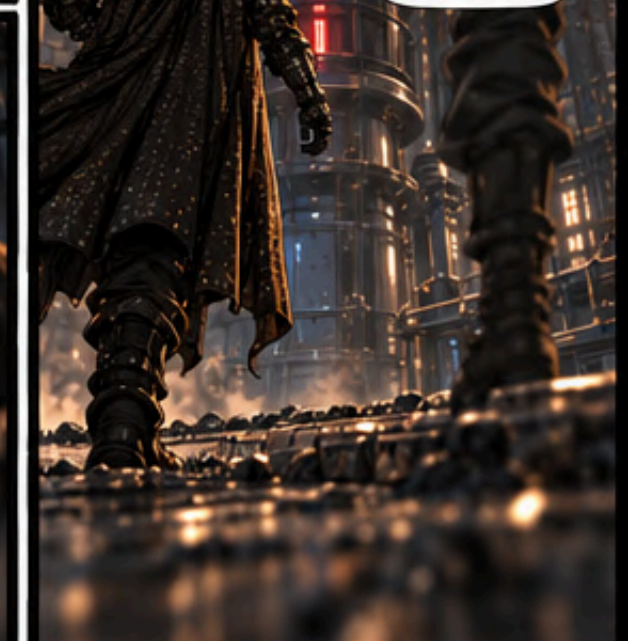

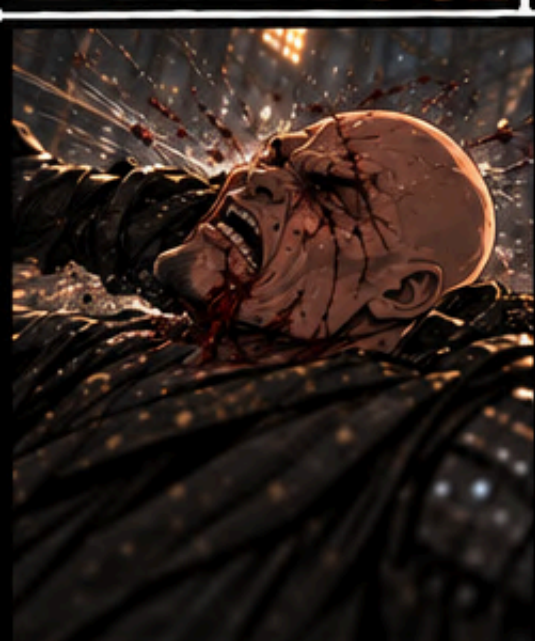

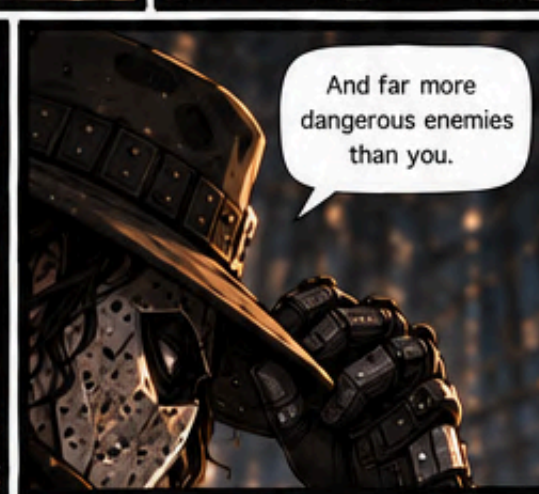

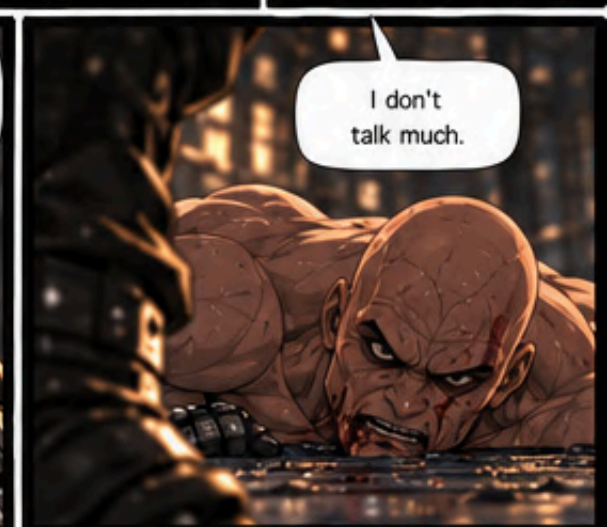

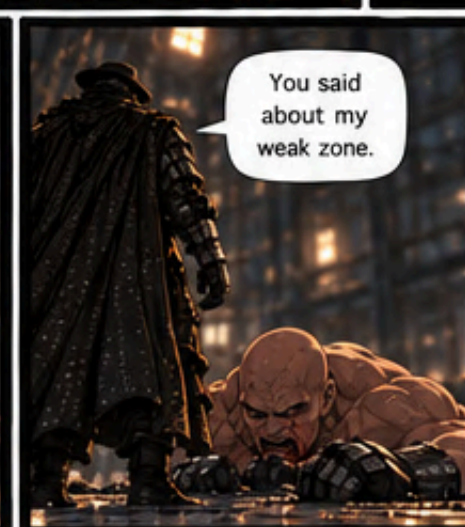

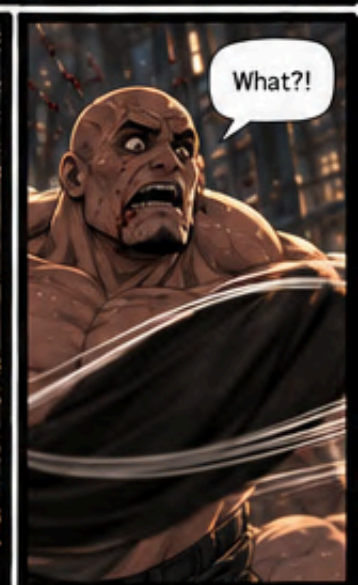

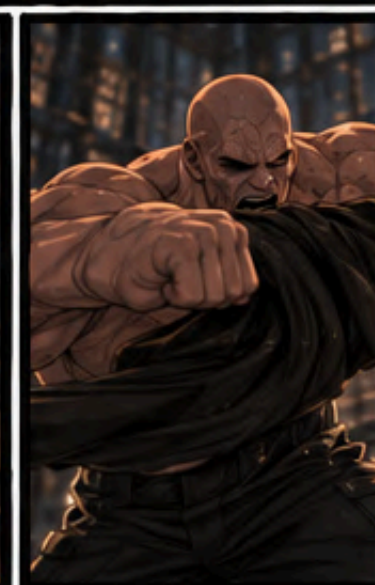

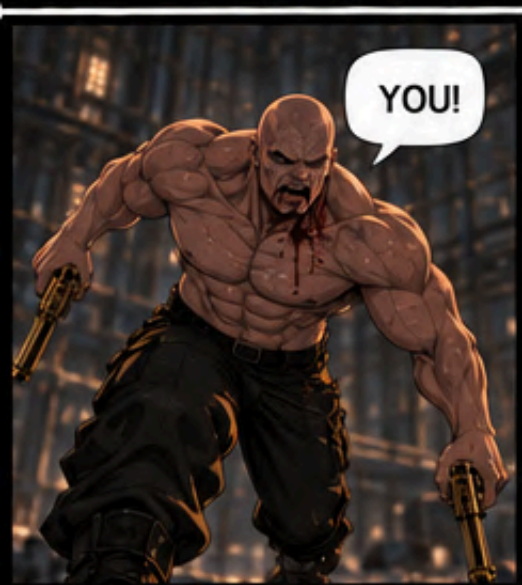

You can do it. You're the only one who can do it!

ZAP!

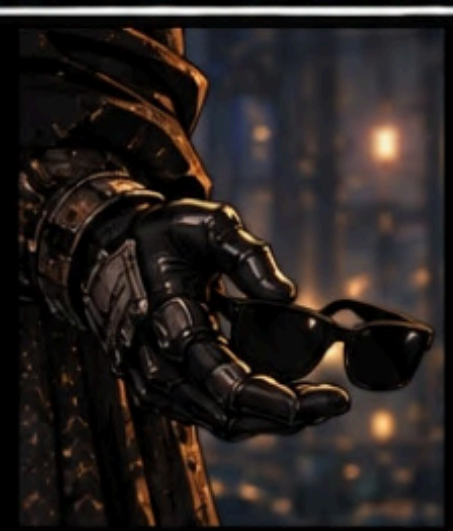

That was really a nice shot, Extinct.

I thought your eyes had gotten older with your age...

...but they're still sharp as an arrow.

You did good, Laks.

How many times, Russian?

Finally, I saved you.

You don't need to thank me for that.

It's the opposite, I guess?

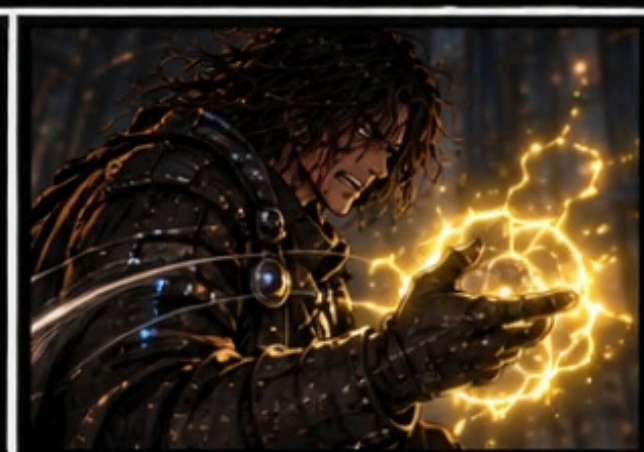

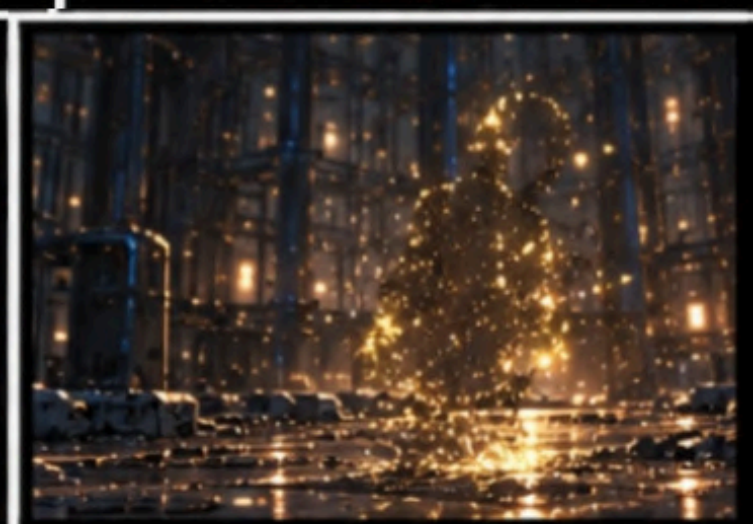

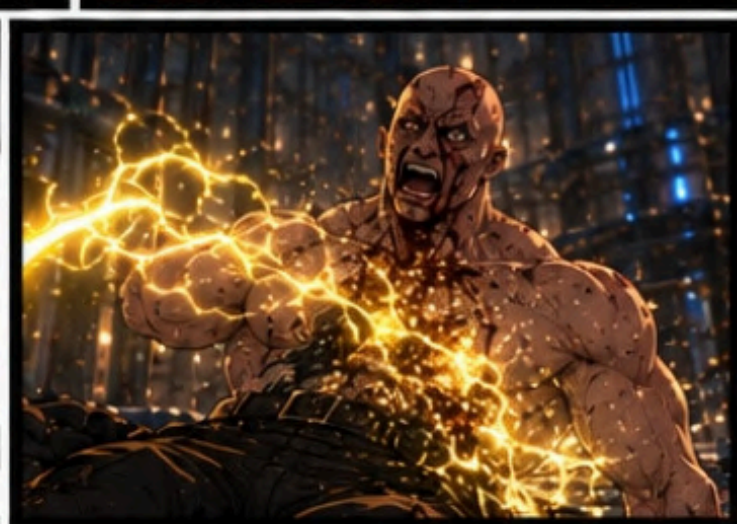

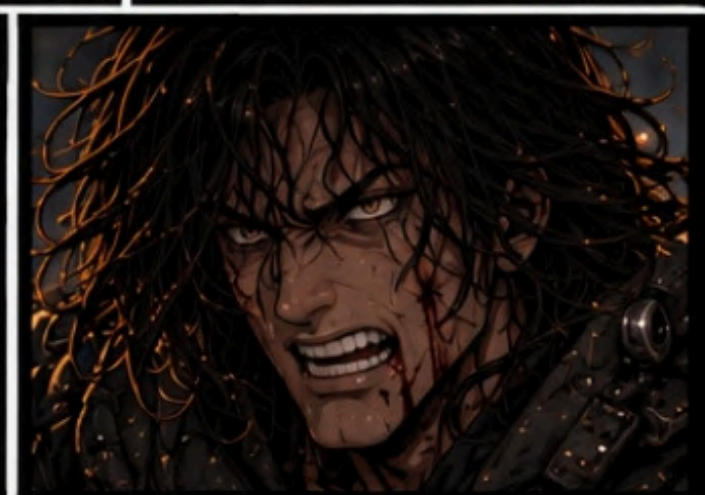

Yeah, okay then.

Yes before you grow big, don't know why they taking long time

It's one-one. Both did our job well.

Did you informed Syndicate?

What did you do?!

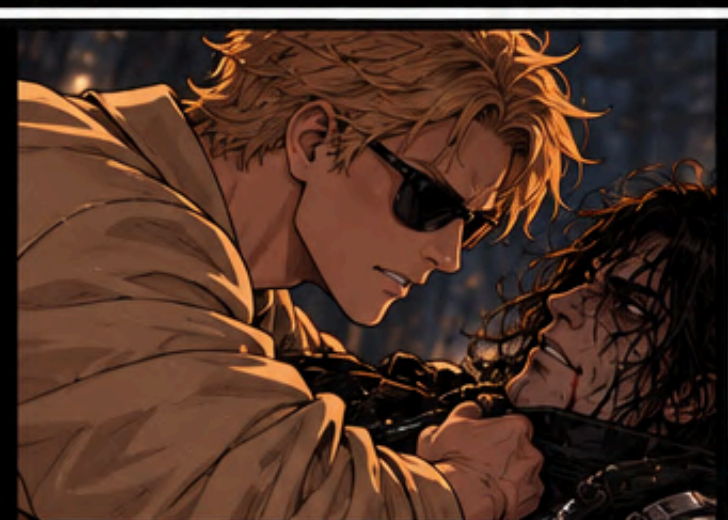

He teleported him.

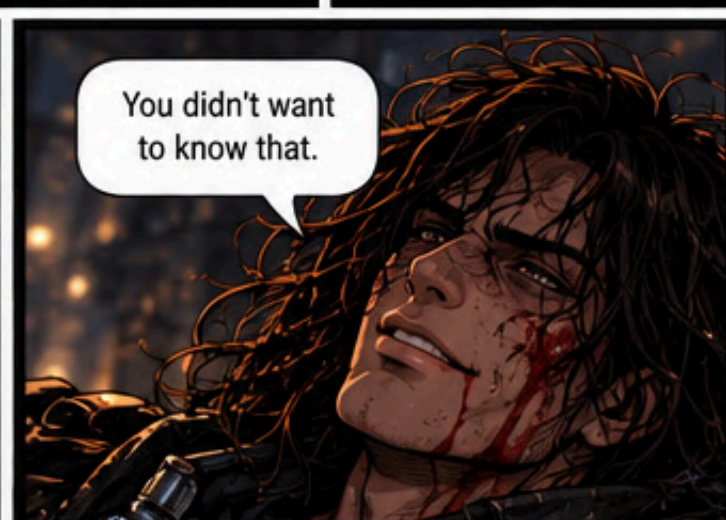

He can teleport?

That is his power.

WHERE?

You didn't want to know that.

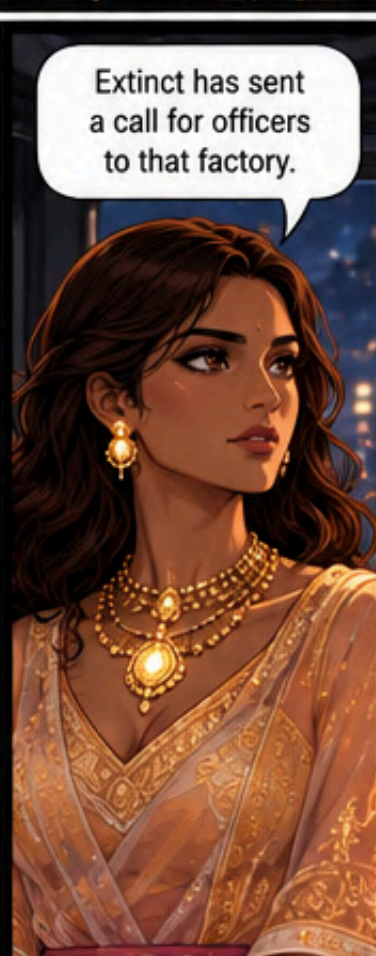

...

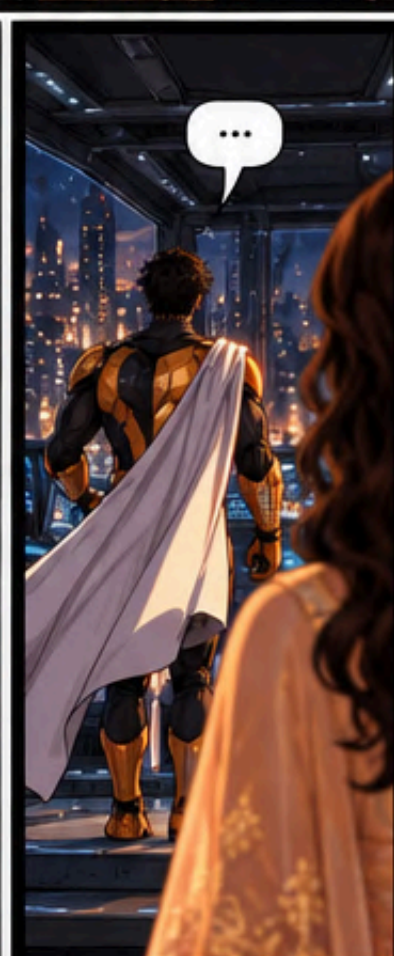

After Chilltank Battle

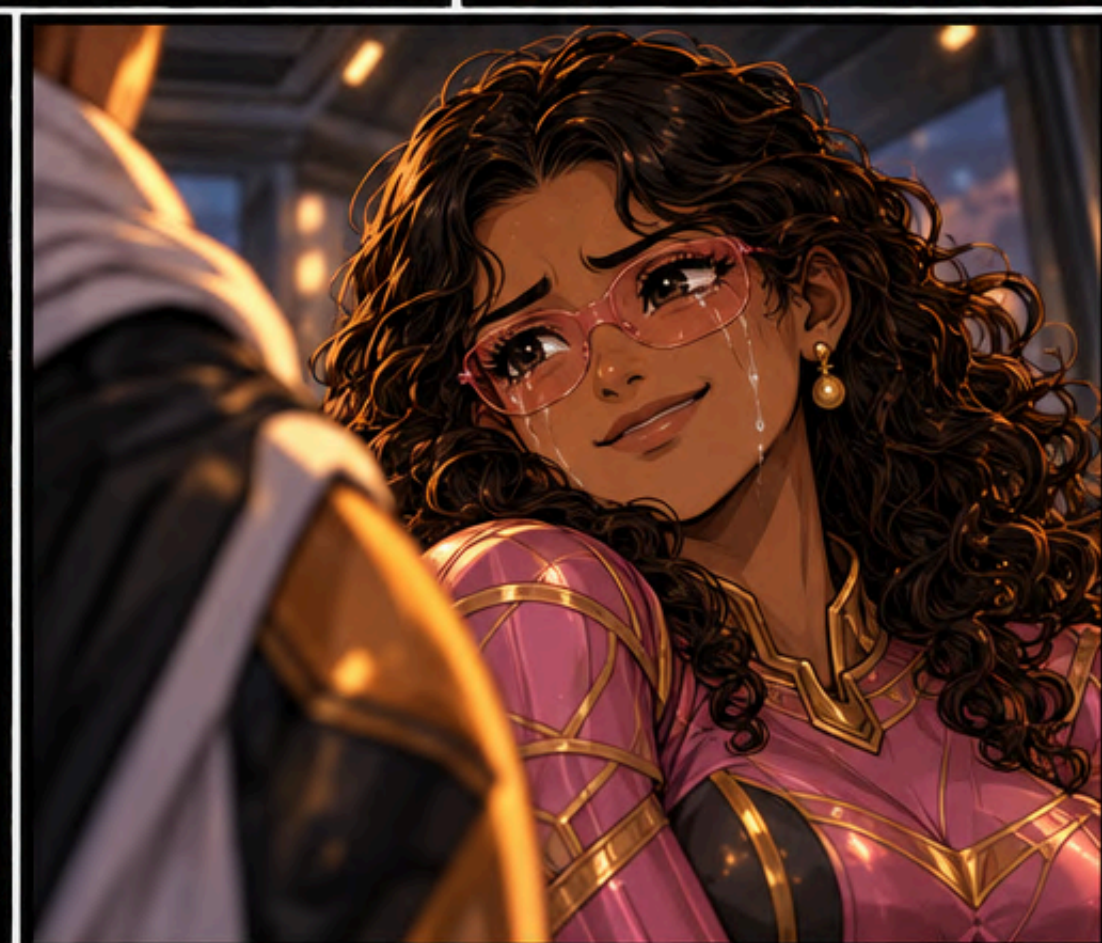

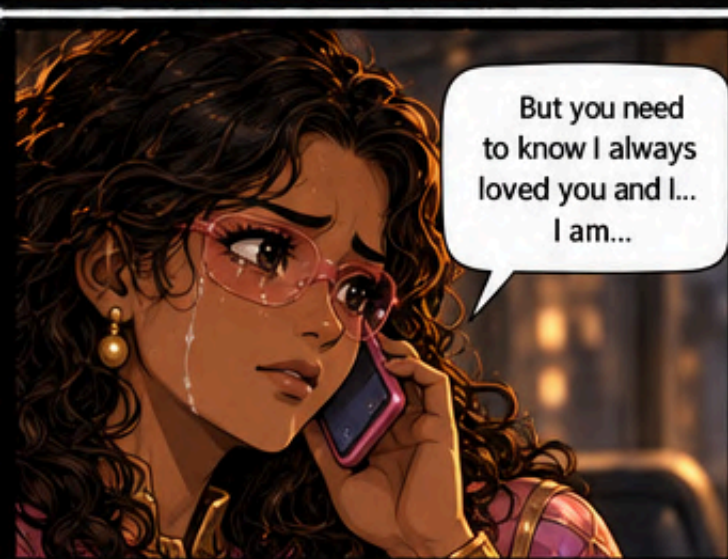

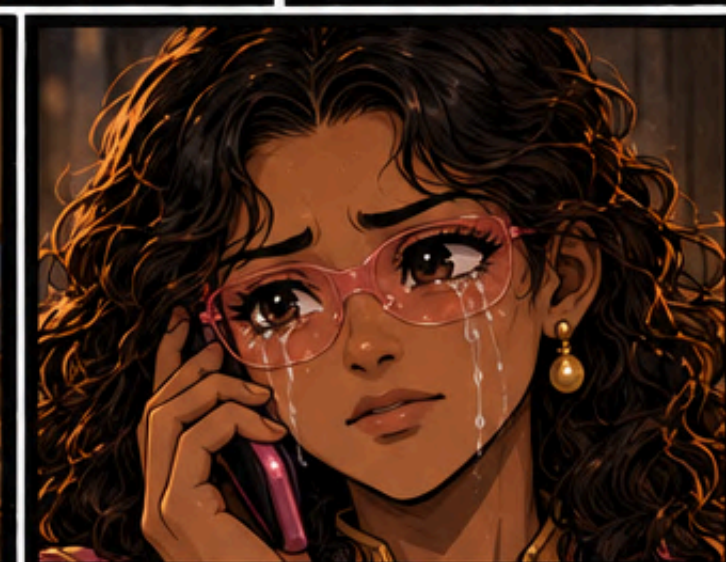

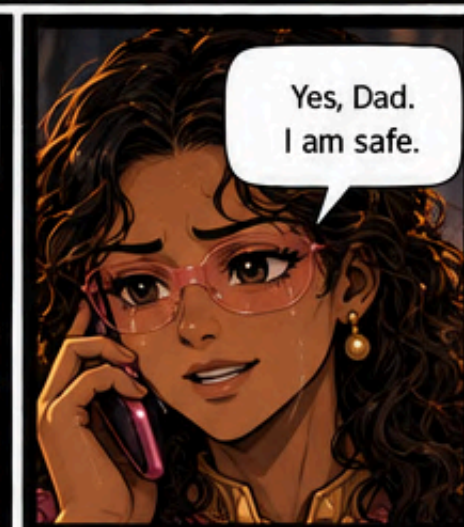

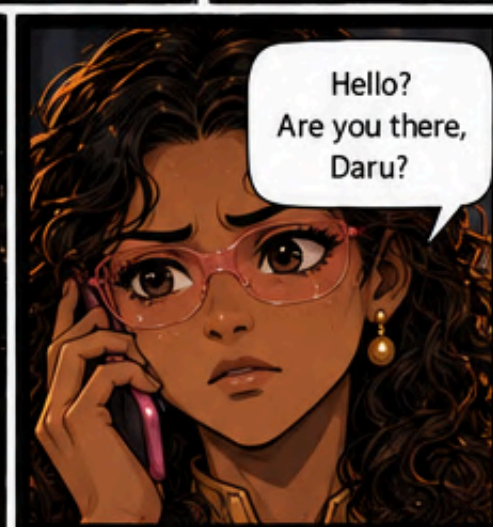

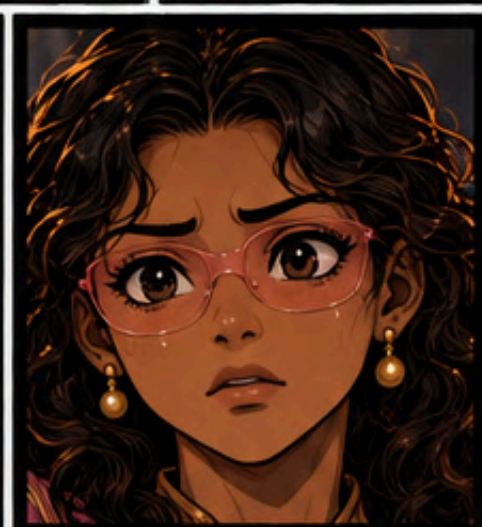

Extinct has sent a call for officers to that factory.

Mm. It means something is happening there. Send the officers soon.

...

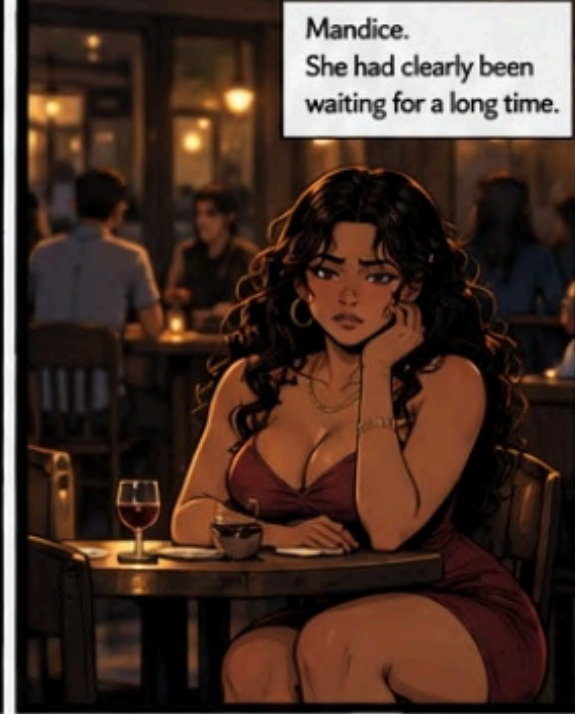

A small coffee shop in the city.

Hazard walked into the shop. He looked around, searching for someone.

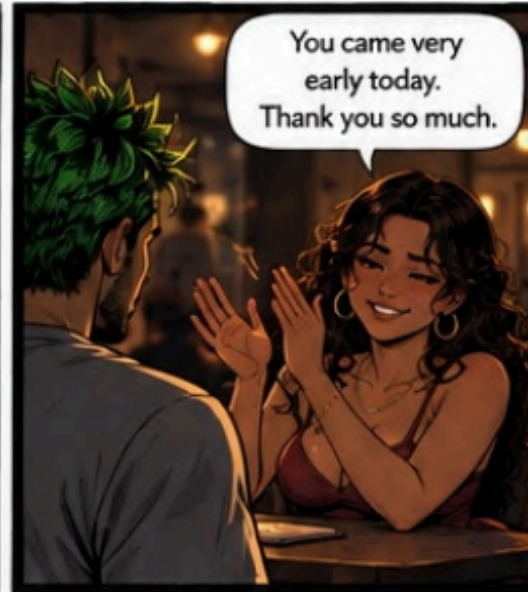

Then he spotted her.

Mandice. She had clearly been waiting for a long time.

Wonderful, superhero.

You came very early today. Thank you so much.

Do you even understand? I've been waiting here for four hours!

And you just came here, sat down, and didn't even apologize for being late!

Mandice, you know there was this guy—

So what? Another excuse?

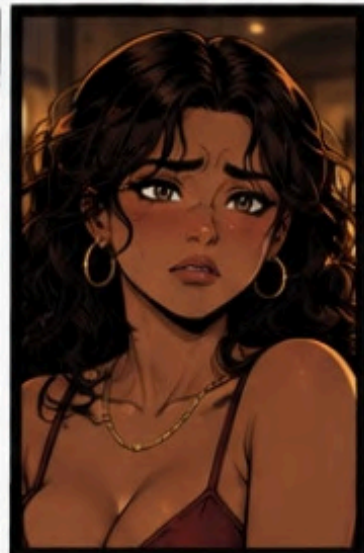

If you're so busy with your job, then do your job!

Don't have a girlfriend!

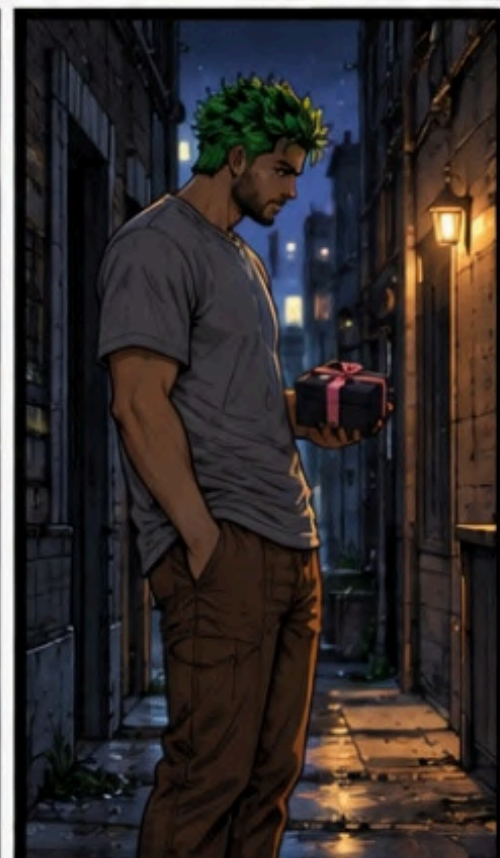

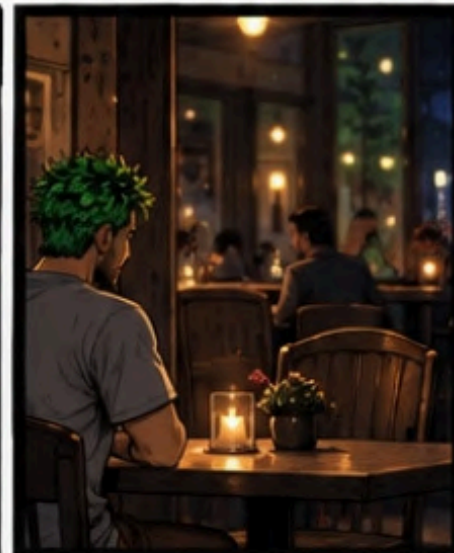

You'd gain more girls anyway with all that fame, right?

Okay... Then go away.

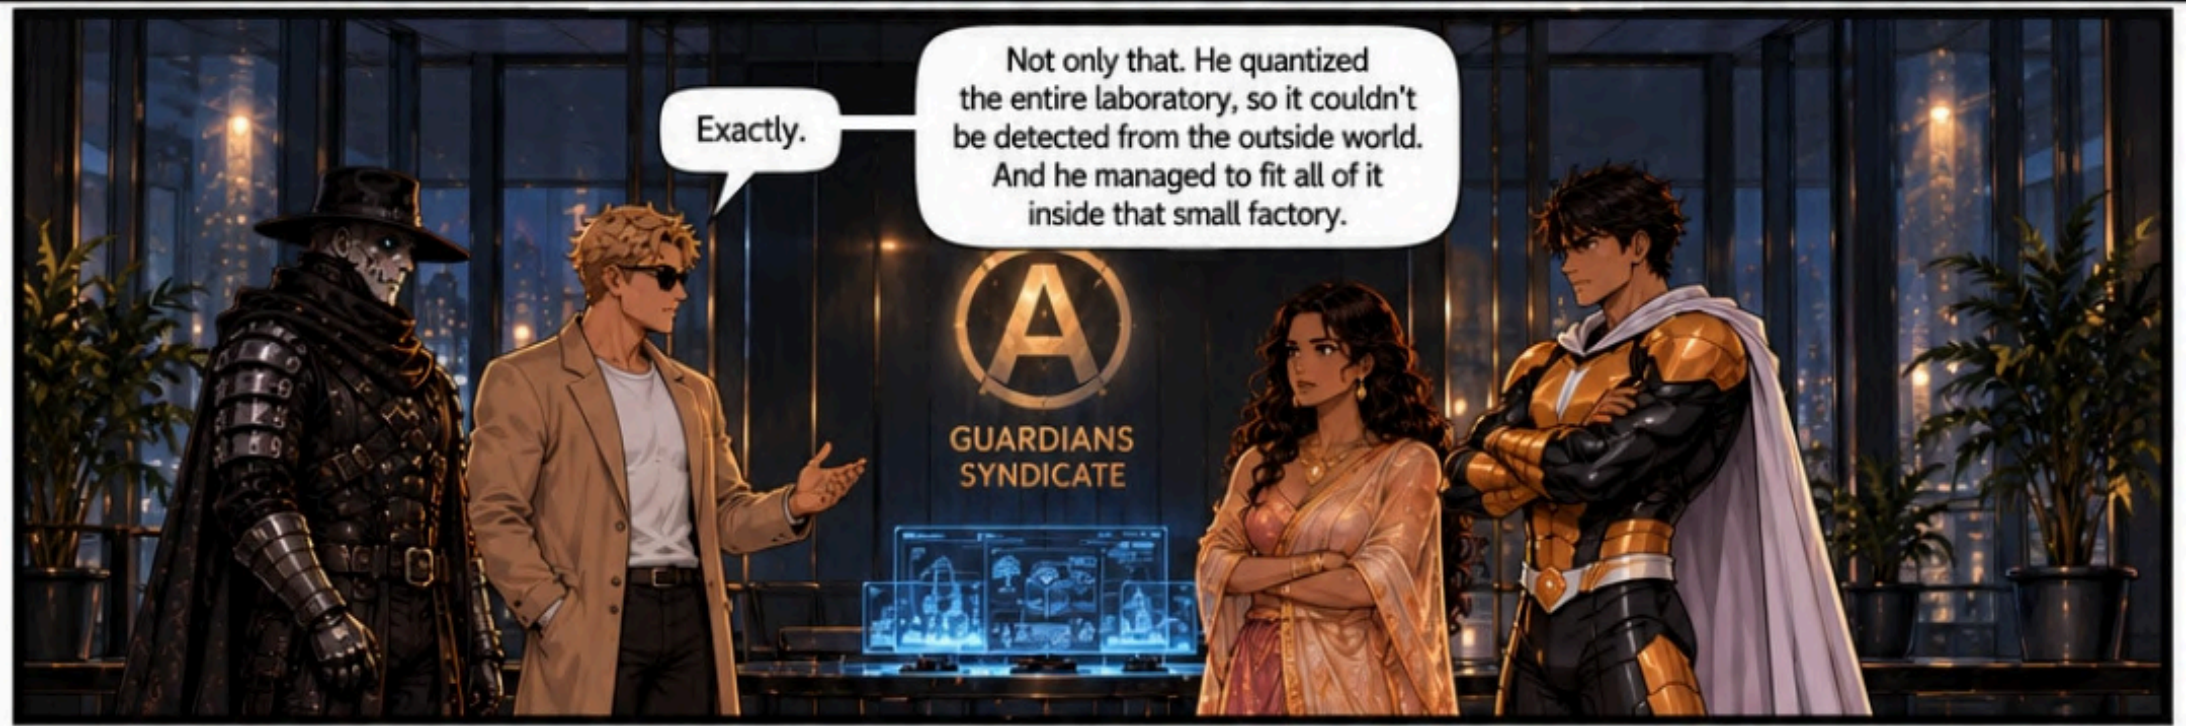

You wasted our date. And don't ever try to calm me down anymore.

Waste of time.

So you're saying that Skipper teleported an entire generator laboratory from Texas into that abandoned factory?

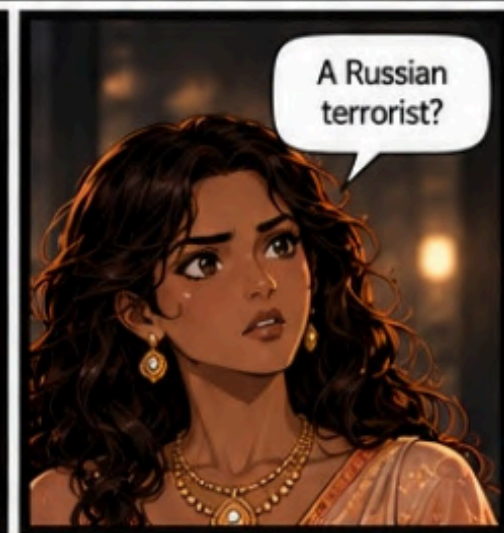

Exactly.

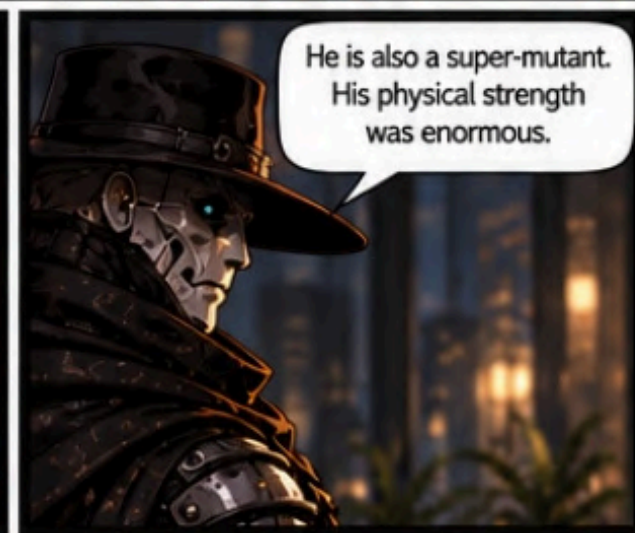

Not only that. He quantized the entire laboratory, so it couldn't be detected from the outside world. And he managed to fit all of it inside that small factory.

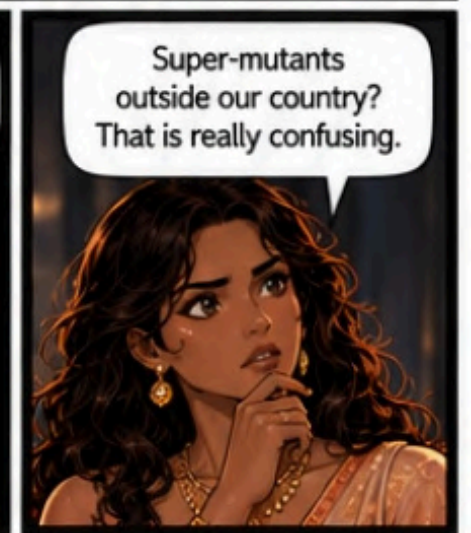

And there was a Russian terrorist with him.

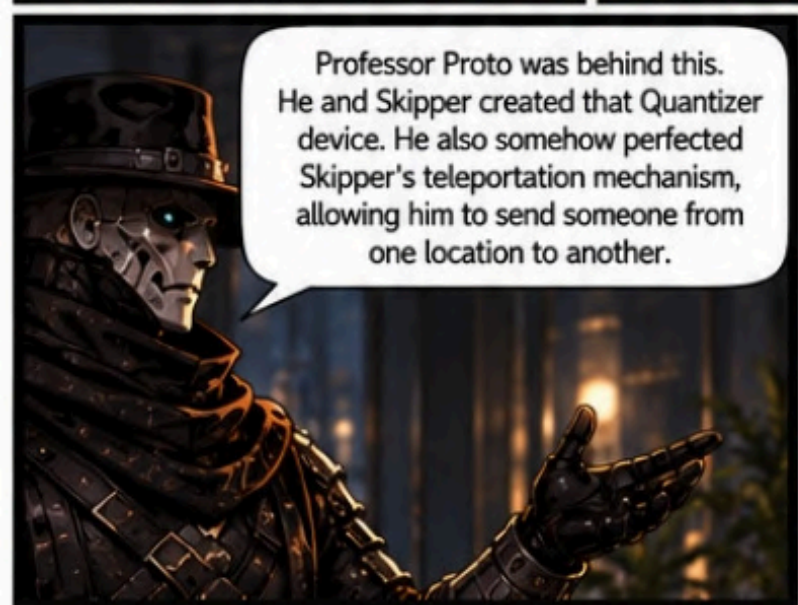

A Russian terrorist?

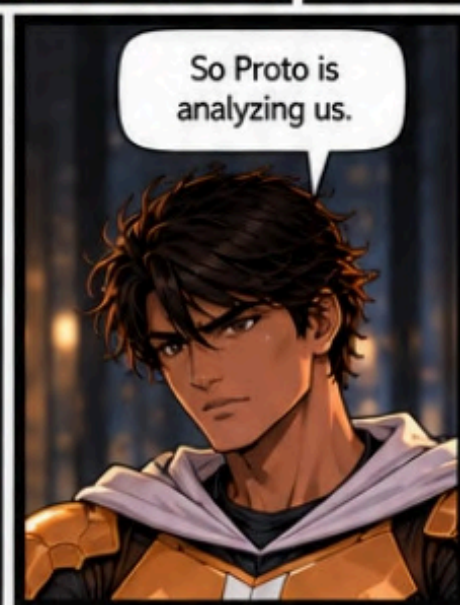

He is also a super-mutant. His physical strength was enormous.

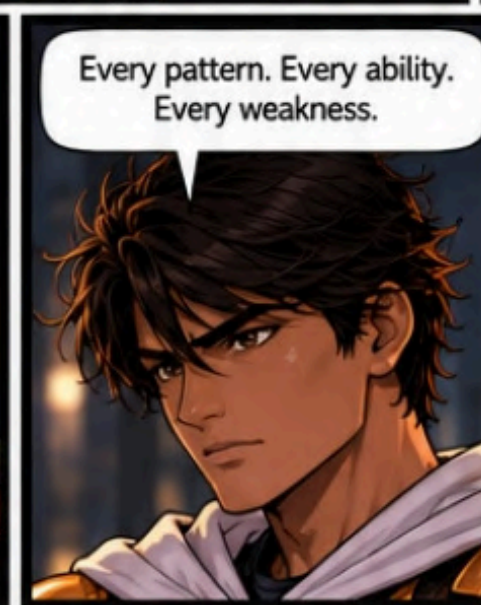

Super-mutants outside our country? That is really confusing.

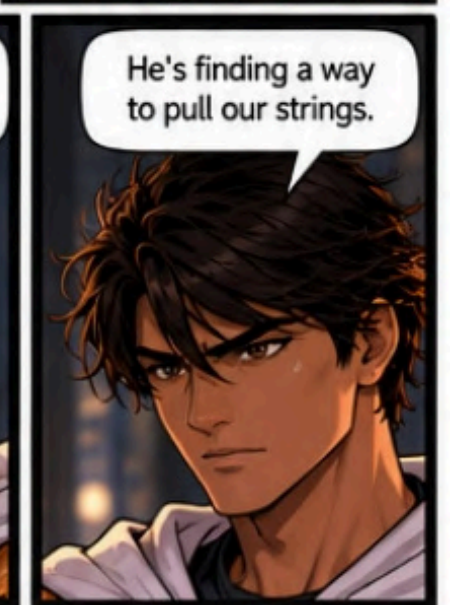

Professor Proto was behind this. He and Skipper created that Quantizer device. He also somehow perfected Skipper's teleportation mechanism, allowing him to send someone from one location to another.

So Proto is analyzing us.

Every pattern. Every ability. Every weakness.

He's finding a way to pull our strings.

Then he was behind Glow Plug too.
